"We have about 250 commercial Angus Cross cows, and use our Hereford bulls from Blair Athol Farms on about 100 cows.

These calves hit the ground and get up and go! The Hereford cross calves are full of vigor and life right away.

They have exceptional bone, grow fast, have heavy hair coats and are very easy to handle. The hybrid vigor on the purebred and commercial cows is highly noticeable as we have not treated any calves for anything. They are deep sided, long bodied and have great feet under them.

The bulls themselves are very easy to handle in the cow herd or not. Easy keeping, great herd sires."
