COMPLETE RED ANGUS

DISPERSAL

WELCOME...

L
S

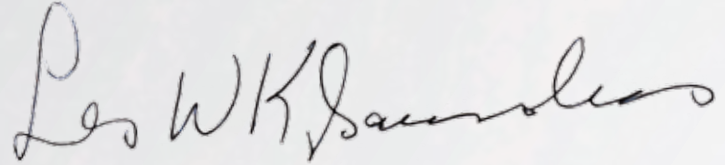

Welcome to the Maple Ridge Acres one and only cattle sale.

This being the first sale, it has been a greater learning curve than expected. The 100+ year family homestead in Borden and my hard working, stubborn, five foot tall grandmother is why we exist today. Our grandfather died of the flu in 1919. We are now the third generation. I decided to go heavier into cattle in the mid 1990's and decided on red British females. In 1997 I purchased Red Angus purebreds, just in time for the drought, BSE and then excess rain that caused flooding.

Sires are a mix of A.I. and walking bulls. The cattle are raised on native pasture in the summer with different feed rations in the winter, depending on availability. This has resulted in moderate framed, easy fleshing cattle that should perform well under most management and rations.

Hope you have good luck with your purchases.

Join us for lunch prior to the sale and hospitality after.

FROM THE DESK AT T BAR...

Welcome to the Maple Ridge Acres Complete Red Angus dispersal on December 19th in Saskatoon, Saskatchewan. With little fanfare, Les Saunders has quietly developed a Red Angus cow herd based on the strength of families.

Dispersal sales always have a hint of sadness as we lose a fellow producer, but they are windows of opportunity for enthusiasts of the livestock industry. Only in a complete dispersal can one select from the top and heart of the herd to establish your own new family or families. As always in a cow herd dispersal, the females are the feature but the bull calves at side give you an opportunity to do your spring bull shopping prior to the new year and capitalize on tax savings. Les is offering a wintering program and terms on all the males, including the powerful long yearlings and herd bulls.

SHANE MICHELSON
403-363-9973

The many years of culling and selection has resulted in a cow herd that is strong in stayability, soundness and longevity. Les was always concerned about udder shape and milk flow and the ability for his cows to forage and thrive in adverse conditions. The cow herd is young and very fertile, as indicated by the many A.I. conceptions. The only shows that Les Saunders attended were those as a spectator.

December 19th is opportunity day in the Red Angus breed. Never has the time been better to ship several of the old and inefficient producers in your herd and replace them with young new genetics, strengthening your program. Give Les a call if you would like an on-farm preview, he is located near Borden, Saskatchewan... he will be pleased to give you a tour. Come early sale day and be guests for a noon luncheon and refreshments.
