## FROM THE DESK AT T BAR...

CHRIS POLEY  
306-220-5006

Welcome to the 32nd Annual Keystone Klassic Angus Female Sale, December 5, 2020 in the heated facilities of the Keystone Centre, Brandon, Manitoba. This event is one of the longest running sales in the breed and a source to some of the industry's leading genetics. If you look at the list of breeders involved in this event, you will find that quite a few host their own successful bull sales each spring and are the major suppliers of high-quality sires for purebred and commercial producers. Many of the females selling are either paternal sisters or pasture mates to the bulls that headline the spring season; so you can be assured these front pasture females have been selected from the top.

SHANE MICHELSON  
403-363-9973

The lineup is powerful and exciting, whether you are looking for red or black seedstock. The bred heifers are broody, stout and carry early services to the freshest genetics in the breed. The 2020 models are fancy and offer that unique hint of competitiveness we all seek and are ideal for juniors of any age. Again, this year, these progressive breeders offer their special junior incentive for youth in the industry. There is always a bonus... the offering is already halter friendly.

BEN WRIGHT  
519-374-3335

As this strange year is ending, economics enters the picture. The bred females are a month or two from dropping you a coupon on your investment. In some cases, the price of the first calf can pay for its mother. It is also that time of year where taxes become an issue and I know how many of you like to pay taxes. Finally, the beef cow inventory in Canada has been dropping every year in the past decade and that shortage will eventually have to be filled... there is nothing better in doing so, than purchasing a "Queen for your Pasture!"

Feel free to call or visit any of the farms of these leading breeders and preview the stock. The cattle will be ready for viewing the afternoon and evening prior the sale. It will be worth the trip!

During these times, feel free to call anyone on our T Bar C team to discuss or purchase any of the cattle offered. We will be pleased to assist in a professional and confidential manner.

This is a ET calf with all the bells and whistles. We had high hopes of having this girl out on the show circuit this fall, 2020 of course, had other plans. Our loss is your gain. To us this powerful female checks all the boxes and combines tremendous depth of rib and rib cage dimension, length of spine into an attractive dark red package. 022H's recip dam did a whale of a job raising her and being a very large recip dam ended up growing 022H with a bigger BW than we'd normally expect out of the Bayberry cow. If you're a numbers person don't let this deceive you. When we showed her dam, Red Double MM Bayberry 1Z, in 2017 she not only collected titles at Ag Ex and Agribition, but sparked the interest of many progressive cattlemen and women. With this, Leonard Tufty of TNF Angus in Alberta and I partnered up on a flush and Juggernaut was the obvious choice. While being kept exclusive, Juggernaut has outdone himself on his progeny, most notably, siring a high selling female for Ter-Ron Farms at the 2019 edition of the mighty red round up. Consider this opportunity! **Retaining a flush.**

If you spend much time at ACC you'll notice we are really fond of Red ACC Lambda 1Z. She raised our feature sale bull in 2018, Red ACC Big Shot 118E, who made it on the CAA 2019 top 20 sires for registrations. We've flushed this deep red, power house cow successfully several times and had some really impressive offspring in 2019 and 2020. These two heifer calves are extremely unique as they are embryo transfer twin sisters out of the same embryo. Dr. Immerkar remarked that there is approximately a 1 in 400 chance of an embryo splitting in the recip on day eight. We thought it would be fun to bring both of these unique females to the Keystone Classic and sell choice on them. These are the only two heifers we have out of the Creed x 1Z mating, which worked fantastic. If we were taking a pen of bulls anywhere this year it would have been three Creed x 1Z full brothers. **Selling choice on full possession of one female and we take the other one home.**

We really wanted to bring a "ringer" to the red division of this sale and feel like 615H is exactly that! Sired by the exclusive outcross sire, NCJ Coming In Hot, this girl checks all the boxes. The amount of rib shape, depth of body and top this heifer possesses is mind blowing. Starting out at just 57 lbs., she has been on an incredible journey ever since. The dam, 4F, is a moderate framed Razor daughter with a gorgeous udder. We toyed with the idea of showing the pair this fall but COVID put the fire out on that idea. This heifer, we feel, has future donor potential. Check her out sale day, she'll be coming in hot!!

Rhonda has some big shoes to fill. Last year we drew some attention with a heifer calf sired by Red Six Mile Eliminator 241E. He was a popular bull in the Six Mile sale a few years ago and has not let us down yet. He has an outcross pedigree on both sides with a fabulous cow family backing him up maternally. 629D is a cow that came in-dam through the Sunset Ridge dispersal a few years ago. She has had a couple bull calves so far with her last year's model selling to Prime Ridge Stock Farm.

Red Nu-Horizon Ruby Lee 8038F  
 Dam

Ruby Lee is a very fancy calf with a deep history with the Keystone. In fact, she was here last year when her dam was consigned by New Horizon Angus. Her granddam, 59A, was selected by them from Mar Mac though this sale as well. Another daughter of 59A, being 511C was selected by us through this sale also. 511C was the main reason why we purchased 8038 last year. This cow family is one to take notice of. SSS Tactic was a high seller for SSS a few years ago and his semen and offspring are rare and sought after. It took some serious arm twisting to get this female consigned but we have always stated that sales management can have their choice....so here she is.

Look at this heifer's birth date of March 9, 2020. If you are looking for a female with natural thickness, style and an excellent disposition, here she is. Juniors with Showdown in Manitoba next year, it is time to select your heifer to start working on. Easter is a strong cow family at Mar Mac and Ripzone is leaving tight uddered, good milking females. Here is a female that will make a mother cow and a show heifer.

**Mar Mac Farms Junior Incentive Program**

Buy a female and participate in the National Angus Showdown or your Provincial Junior Angus Show with your heifer.

Class Winners receive \$100. Division Champion \$250.

Grand Champion Female \$500 (to a maximum of \$500).

We feel very strongly that youth are the future of our industry.

This footnote brings a lot of memories from this very sale! This heifer's great great granddam was a Keystone Classic purchase in 1996 from the Logeot family. Her great granddam was sold by ourselves as a bred in the Keystone Classic in 2002. We then purchased a female out of the KayMac dispersal which is this heifer's granddam. What a fabulous cow she was for us! Longevity and production! WKJ 129H's pedigree has some old school red genetics: Branded Beef, Paramount, Major League, Century and Raw Deal! If you attended the South East Sask Angus Showcase Tour this past summer, you will remember her sire, as he was on display at eight years old. Thanks for all the great comments!

We have been quiet on the Red Angus side of things for a few years, but the last of our red purebred cows are aging out and Brad had to breed this cow to just see what would happen. Here she is! This heifer we believe has a lot to offer!

This past summer we were honoured with the opportunity to be a stop on the SE Angus Showcase Tour. With all the amazing comments and encouragement we decided to consign Red Emmatt Creek Tara 07H. She's clean through her front, big topped and stands on a great set of feet. Her pedigree is full of power and longevity. She is her dam's first try, we couldn't be more pleased with the results. Don't let this opportunity slip through your fingers.

BW: 92 lbs. WW: 726 lbs.

BW: 4.6 WW: 46 YW: 75 MM: 27 MCE: -2.0

The dam of this lot was my pick of the T-K dispersal sale at \$5100. Kevin said 14B is a cow you can build a herd around and he was right. The dam and granddam of 14B were ET donors and I'm sure she will be heading there herself. 137G is super deep and soft made, with momma cow written all over her. Do I need to mention that the sire goes back to the magical female maker Copenhagen. WOWSER have a look here if you want to add power to your herd.

**AI bred to LSF SRR Hedge Fund 7017E on April 18, 2020. Pasture exposed to Red Cockburn Distinction 8068 from May 1 to July 31, 2020. Vet checked on October 30, 2020 and calf due early February 2021. Should have caught AI breeding.**

BW: 72 lbs.

BW: WW: YW: MM: MCE:

Red Fraser Trina 940G has been popular all summer. As a calf, she started out with a small 72 lb. birth weight. Take note of the Trina 6N cow in the pedigree. She was a donor cow here and had a couple high sellers through this sale over the years. 763E is a cow that quietly goes about working. She has one of the bigger bull calves this year that will draw some looks in March. Poker Face continues to shine in our herd. His daughters that calved this past spring are sure to make great long-term cows. This fancy dark red female with a nice black foot will make a great cow. And even more intriguing will be the calf inside. Bred early to the black/red carrier son of S A V Resource. His calves are cool!  
**Pasture exposed to MRLA Resource 23F from April 18 to June 25, 2020. Preg checked on July 22 to be 85 days for an early February calf.**

Here is a tank of a female. Maybe not the type that will win a show but definitely the kind that can raise you a herd bull. When you tour our cow herd you'll find a bunch of Blockannas. We hold them with high regard. They are big bodied brood cows with extra base width and top udder quality along with production records. 424G's granddam is a current donor cow who stems back to the great S A V Net Worth 4200. As an added bonus, this heifer is safe to the outcross bull, Duff Red Blood.  
**AI bred to Duff Red Blood on April 18, 2020. Pasture exposed to SSS Glenfidich 741G from April 29 to July 11, 2020. Preg checked safe to AI.**

Cassidy is one of the strong cow families in our Black Angus Program. As the only one of the founding members of the Keystone Classic, each year we try and bring females that we feel will go on and work in the industry. Cassidy is the first female to sell out of Youngdale Finley and a 1/2 sister to our female who sold last year to Justamere Farms Ltd. at Dauphin. The Finley bulls will be ones to stop and look at in the 2021 Mar Mac Bull Sale on March 10, 2021 for their thickness, style and performance. Cassidy will be a female to take to Showdown in 2021 as she has an extremely good disposition for a junior member and classy young lady.

**Mar Mac Farms Junior Incentive Program**

Buy a female and participate in the National Angus Showdown or your Provincial Junior Angus Show with your heifer.

Class Winners receive \$100. Division Champion \$250.

Grand Champion Female \$500 (to a maximum of \$500).

We feel very strongly that youth are the future of our industry.

This fancy, hairy heifer is incredibly attractive and feminine. She is a proud girl who likes to show herself off. The Attractive cattle have been well received across the land. We are calving out our first Attractive daughters in the spring of 2021. They are looking awesome and dropping, what appear to be, gorgeous udders. Scheifelbein Attractive was selected to use as an AI sire here because of his strong phenotype, extremely sound structure as well as his outstanding birth to weaning numbers. Vision Unanimous has worked well at our place. The bulls and females have performed well. Lucy 71C has been an amazing female with tremendous depth of body, terrific leg and foot structure and near perfect udder and teat length. A full sister sold to Brodie Gutzke, Weyburn, Saskatchewan, last fall and a paternal sister sold to D & K Angus, Daryl Fought, Cobden, Ontario, last year as well. This heifer is halter broke, ready to show. She presents herself well, has great angles and lines and responds well to the show cane. If you are looking for a competitive show heifer that will make a productive cow, then this may be the opportunity for you.

Northern View Duchess 96G  
 Paternal sister sold to Daryl Fought.

Gentle disposition in this heifer without a doubt. Super easy to manage, halter and show cane comfortable. This long spined heifer has excellent hip and rib shape. Entice is known for his great disposition, fantastic growth from birth to weaning. This female is very well bred, full of power with the Entice, Upward and strong female genetics in the Beauty cow family. If you toss in a sprinkle of Upward and a dash of Beauty you have a stylish, productive and powerful Beauty 92H. This female is very well bred, full of power with the Entice, Upward and strong female genetics in the Beauty cow family. We have a maternal sister due to have her first calf this spring. She looks outstanding. The power and femininity of this heifer make her a real cool female that should be able to lay down and drop a power bull calf or a functional, stylish heifer calf. She should be an excellent producing cow. This heifer would make a real nice junior project.

863H hails from our powerful Mayflower cow family. She is broody in type but feminine enough to be a front pasture kind of cow. Her Fortitude sired dam has a perfect udder and great production record for a young cow. She has one daughter in production at Wilbar already and a son sold in our sale this past spring as a sale feature. These Rewind sired females are making their mark at a young age so take advantage and get one while available.

Lilah is a Stunner daughter that comes from a long line of front pasture cows. If cow families and consistency matters to you, look no further. Her granddam, S7R 77W Fern 50Y, was the first Angus female exhibited at Section 7 Ranch. She went on to produce numerous attractive bulls and females. 50Y's daughter, 66D, is a wide based, moderate cow. She has already produced two impressive heifers that have hung banners. We feel that Lilah could easily follow in her sister's footsteps, if given the opportunity. Lilah is deep bodied, structurally sound and ties it all together with an attractive front end. We believe she will produce just like her ancestors and her balanced EPD profile is the cherry on top.

Abigale 360H is a very stylish and correct heifer. She comes from a cow family that displays deep bodies and have good temperament. Her dam and granddam are our lead cows. With S A V influence on both sides of her pedigree she should prove to be a good cow in any herd. We have retained a maternal sister who has raised two eye catching calves. Her maternal granddams have all been foundation cows. It is hard for us to part with Abigale 360H as the females of her family are stand out cows in our herd. Both of our lots are daughters out of our home raised S A V Angus Valley son. He has an incredible amount of muscle shape, long body and very good temperament. We have used him for a few years now and time and time again we are very impressed with his progeny. We have retained alot of his daughters and have had customers happy with the performance of his sons.

This heifer is one to catch your eye come sale day. Grace 10H is a moderate framed heifer with excellent fleshing ease, stoutness and phenotype. Grace 10H's mother, Grace 640D, is a model cow at Jaymarandy Livestock. Grace 640D has all the traits I look for in a cow: great udder, sound feet and legs, fleshing ease and broodiness in a feminine package. This girl has all the pieces to become an exceptional cow.

We've waited five years to consign in this sale and the wait was worth it, as I am extremely proud of the two offerings we have in this sale. Heroine 31H is a long bodied and larger framed Resource daughter. Comes from a good uddered and highly fertile Brookmore bred cow. I chose this heifer's grandmother from my pick of the heifer calves at Brookmore Angus eight years ago. 31H combines the stoutness of Resource and the frame and length of her dam into one interesting package. I'm confident 31H will turn into a cow that will make great calves for a long time.

140'20 may be the best cow prospect to date off of the N7 Desperado herd bull. He's proven himself to be a consistent female maker, with his first progeny calving in the spring of 2020 and another strong group of heifer calves in the replacement pen. Paternal sisters have tidy udders, are good footed and raised good bull and heifer calves in their first crop. The dam of 140 is an exceptional three year old cow I purchased from Brett McRae, who will be an exciting breeding piece, with many proven herds lining up in her pedigree. Breed this one up, come calving time you're sure for an exciting calf out of the gate!

We lucked out and got the opportunity to purchase the highly acclaimed sire, Sandy Bar Ambush 10Y. We've decided to dig right into the heart of our program and offer you his feature daughter, RCR Queen Mother 107H. This girl's pedigree is stacked with Angus females that have stood the test of time. Her paternal grandmother, according to Bob Switzer, is one of the most correct cows he's ever seen. 107H's maternal grandmother is the lead of our Black embryo program. With genetics like this, we weren't surprised when 107H caught Chris Poley's eye. We're excited about the future of this feminine, wide topped, good footed, fancy girl, she'll fit right into any show ring and produce with the best as a brood cow.

Missy 010H; another 94D female that we love. This female combines every major cow family here. The guesswork here is already done for you. The years of great breeding decisions have paid off with adding 94D and the Bardettas into it. You could easily hang a halter on her and she will compete. Study her, if you are like me, the more you look the more you fall in love with 010H. She has the hair, the body length, which ties into a nice tidy package make sure you mark this prestigious female in your catalogue and check her out sale day.

 Sire

Emily 097H is the little sister to 918G, she is the outstanding bred we are offering in this year's sale. 097H, herself, is a heifer calf we love, already showing that broody cow look. 097H stems from some of our most prolific cow families here. When you combine the Emilys and sired by our Captain Obvious bull, you add the Novas into the equation; it just completes the pedigree. These cow families have stood the test of time here for over 30 years so you know when buying this female you are getting the heart of the herd and a future front

pasture and donor female. Make sure you take the time to evaluate this young future herd matron. She is good! Sells choice with 918G

Emily 918G is sired by EXAR Resistol. Resistol has done an outstanding job siring both females and bulls who have topped our bull sale for the past few years. 918G is a female of very high calibre, very nice headed, clean necked that ties into a good smooth shoulder which explodes into a huge middle. 918G carries that extra length of hip that we love to see in our cattle. When you set this female into motion she is extremely free moving and very good footed. It is this type of female we love here at Ramrod. Look for her sale day but she won't be hard to find with her little sister. Selling choice with 097H.

AI bred to PFLC Insight 94D on April 5, 2020. Pasture exposed to Ramrod Captain Obvious 885F from May 19 to July 10, 2020. Vet checked favourable to AI date.

Lucretia 043H is a full sister to 965G. The Lucretias are the ones that we started Ramrod with and originated from my grandfather's renowned herd, "Dusty Dale." So, when I say "the heart of the herd" is selling in this sale, the statement is true. These females never miss, year in and year out. 043H is a paternal sister to the bred we showed so successfully in 2019. The future of this young female is nothing short of greatness. She, herself, is massive in her design and make up huge hiped, big barrelled, gooseneck and a head to die for. This female is the real deal. She will compete at any level whether it's the show ring or the pasture, she will be remembered. Sells choice with 965G

Lucretia 965G is sired by our senior herd sire, PFCL 94D. He himself, is siring females that are going to anchor our herd for years to come. These females are the future of Ramrod. 965G is a very complete, sound female. She is very good from the ground up. When you study the heifer, you will notice her near perfect foot structure and bone shape. She is really long bodied which goes into a neat front end. 965G is developing a gorgeous udder and will be an awesome momma cow with her being mated to Basin Payweight 1682. The opportunities are endless. She is halter broke and can anchor the new owners show string for 2021. Sells as choice with her full sister, 043H.

**AI bred to Basin Payweight 1682 on April 13, 2020. Pasture exposed to Ramrod Captain Obvious 885F from May 19 to July 10, 2020. Vet checked favourable to AI date.**

**SELLING 3/4 INTEREST.** This is an exciting combination of genetics as we consider the two grand dams in this mating to be two of the top three production cows in our program. The bonus is it makes her double bred Grace. Double bred foot quality, udder quality and phenotypically prowess, solidifying the maternal base and opens up the options to experiment with any orientation of sire you so wish. Young Dale Grace 169B should not need any introduction as she has been accomplishing large feats including the high selling heifer calf in this very sale last year to Harvie Crest Ranches. For those of you who are unfamiliar with her, she carries a \$32,000 valuation and has over \$80,000 in receipts of production. She has won numerous shows, most importantly she has produced some top production cattle. Including a donor in our program and a top son working for Severtson's Land and Cattle and Daines Ranch. The Young Dale Grace 102Z is her maternal sister and is a standout production cow here that most will not have heard of due to the fact that she only produces females, we don't often let her progeny leave the farm and that trend continues as she had our top heifer calf this year. Factor in the Firebrand mating and the Annie K cattle that are champions globally with an extension back to the World Angus Form Champion Female, Soo Line Annie K 9165. This is a mating that got me really excited to make and makes me even more excited to offer. She sells halter and stick broke and could provide the new owner as legitimate an opportunity at a show pair as any other.

JAYMARANDY GRACE 913G

GRACE 913G

Jaymarandy Lights And Sirens  
Service Sire

Young Dale Grace 169B  
Maternal Sister to JLMA 913G

other than Young Dale Grace 169B and Young Dale Grace 102Z and she is presenting much of the same broody basics plus striking phenotype. Her sire, Colburn Primo has been heavily utilized by many for the impact he is having in the show ring. The added bonus is the feedback he is presently garnering for the quality of his daughters in lactation. If you are wanting a competitive two year old female to show next year, or if your farm's MO is production cattle then the hard work is already done here. She is halter and show stick broke. The resulting offspring will be twice bred Grace cow family and will also qualify for entry into next year's Rose Bowl Sale due to the mating with a descendant of EA Rose 918. Both presenting exciting potential.

Natural service to Severtson's G-Man 288E on March 23, 2020. Pasture exposed to Jaymarandy Lights And Sirens from May 19 to July 27, 2020. Preg checked on November 18, 2020 safe to pasture exposure. Vet opinion due mid-March.

We had originally reported an early service to our newest herd bull acquisition, Severtson's G-Man 288E. Yet, we do pre-sale reassessments of our cattle a few weeks prior to sale time for this very reason. We now have her bred to the exposure date and she is estimated to calve in mid-March to another powerhouse herd bull, Jaymarandy Lights And Sirens 911G. There are things about this bull that make him incredibly unique compared to many bulls on the market, which in fact makes this mating even more valuable. His dam and both his granddams are big time donors; Jaymarandy Grace 640D, EA Rose 918 and Young Dale Grace 169B. His flushmate in this very catalogue is an incredible female

Here is a very powerful Rex daughter selected from my spring calving herd to be in this sale. Melissa and I have seen Turihaua Rex in person while in New Zealand and we both liked him so much that we had to use him here in Canada. He is the best footed Angus bull I have ever seen, and I was very impressed with the entire Turihaua program. Sarah 416F goes back to my original Black Angus cow, Sarah 17P. All of the Sarah females are known for their depth of rib, femininity, and consistency. She is bred to S Chusum 255, a calving ease specialist that I have used for the last couple years on my heifers. In last year's sale, Jim and Sarah Anderson of Right Cross Ranch bought McRae's Jemina 144F bred to Chisum 255 and are considering him as their next herd bull! To my knowledge, neither Turihaua Rex or S Chisum 255 semen are available in Canada any longer, so don't miss out on this rare genetic combination!

**AI bred to S Chisum 255 on April 17, 2020. No exposure.**

Warning to potential buyers!! If you are considering putting your hand in the air or pushing the bid button when this sweetheart goes through the sale ring, be prepared to own her for a very long time. Her maternal granddam, 23L, is the last surviving daughter of our great old herd bull, Johnny Walker 98F. 23L is safe in calf and is due to calf on approximately her 20th birthday. This year her 17 year old maternal sister produced a bull calf good enough to stay in the keeper pen, both of these old girls have impeccable feet. Grace 18G is moderate framed and hard to fault structurally. Safe in calf to Holly's show bull.

**Pasture exposed to HMM Gus 2G from May 10 to June 3, 2020. Preg checked on October 9, 2020, safe in calf.**

A well designed, attractive Big Sky daughter. The Queen cow family has done very well for us; producing hard working, fertile females that are raising calves that push down the scale, are sound footed and have picture perfect udders.

**AI bred to S A V Bismarck 5682 (sexed female) on April 1, 2020. No exposure.**

A well balanced, eye catching Echo from the top of our replacement pen. Big bared, sound footed, complete Bismarck daughter that will turn into a very true maternal female. Her young dam produced another great calf this year that will be in the top of our bull pen next spring.

**AI bred to Ellingson Homegrown 6035 on May 6, 2020. No exposure.**

## TERMS & CONDITIONS

#### Terms:

The terms of the sale are cash or cheque, payable at par at the sale location. The right of property shall not pass until after settlement has been made; no invoicing on buyers in attendance unless previous arrangements have been made. Every animal sells to the highest bidder and in cases of disputes, the auctioneer's decision will be final. Announcements from the auction block will take precedence over the printed matter in the catalogue. Current exchange rates will be announced sale day. All monies are in Canadian funds.

#### Certificate of Registration:

Each animal will carry papers issued by the Canadian Angus Association. A certificate of registry duly transferred will be furnished to the buyer for each animal after payment has been made.

#### Pedigree Estimates

Pedigree Estimates (PE) are created on the projected mating of the animal's sire and dam based on averages of the two, creating estimated values that do not hold the same accuracy of actual EPDs issued from the association and should be used as such.

#### Health:

All animals in the sale have met all necessary health requirements.

#### Liabilities:

All persons attend the sale at their own risk. The seller, facility owner and sale manager assume no liability legal or otherwise, for any accidents that occur. It is understood that T Bar C Cattle Co. (2013) Ltd. is acting only as a medium between buyer and seller and is not responsible for any failure on the part of either party to live up to his obligations. Neither does T Bar C Cattle Co. (2013) Ltd. assume any financial obligations to collect or enforce collection of any monies between parties and any legal action that may in exceptional cases be taken must be between the buyer and the seller. T Bar C Cattle Co. (2013) Ltd. assumes no responsibility for any credit extended by the seller to the buyer. The buyer must look to the seller for fulfillment of all guarantees and representations made hereunder.

#### Guarantee:

Each animal becomes the purchaser's risk immediately after the animal is sold. All animals in this sale will be sold under the terms and guarantees set forth by the Canadian Angus Association with regard to health, freedom from defects and from both reproductive and specific genetic unsoundness.

#### Pregnancy Information:

All serviceable age females have been pregnancy examined by an accredited veterinarian, giving an estimated length of gestation. This estimated gestation period shall be used only as a guideline to calving and is not a guarantee of actual service.

#### Delivery:

Assistance will be given in getting your purchases home. Each animal becomes the risk of the purchaser as soon as sold.

#### Phone, Mail, Wire Bids:

Bidders unable to attend the sale may phone, wire or mail their bids and instructions to the sale manager, auctioneer or special representatives. Bids must be received in sufficient time prior to the sale.

#### Insurance:

We strongly recommend that insurance is purchased for full value.

#### Errors:

All announcements at sale time, written or oral, supercede any written material in the catalogue.
