SIMMENTAL

17th Annual Bull & Female Sale

Wednesday, February 22, 2023 at 1:00 p.m. CST
Crossroad Farms Sale Barn, Shell Lake, SK

WELCOME from Crossroad Farms

Welcome to our 17th Annual Bull and Female Sale. Each year as we put together the catalogue we tend to reflect upon the last year. 2022 was a year full of gratitude for our family. Crops were much better than the previous year, the grass was green and mother nature gave us another long beautiful fall to get the crops off and get some "extra" jobs done before the snowfall.

We are also grateful for Jody being 18 months cancer free! As I write this, it is 2 years to the day that his surgery was a success. It has been a long road to get to where we are now but together we persevered. A health scare gives you a very different perspective on life. We enjoy all the simple things and are always satisfied with the life we have right in front of us. We went from so much uncertainty of our future when Jody got diagnosed to having found an even deeper love of working together and a renewed desire to continue growing the Crossroad roots for the next generation.

Over the last 2 years our kids, Olivia, Shelby, Jaici and Cooper have really jumped into the Crossroad Farms operation with both feet. As this next generation continues to grow up our hearts are filled with pride watching each one of them taking a vested interest in the farm. There is no greater joy than seeing your children/grandchildren share your passion of the agriculture business. Olivia is in her second year of animal science in Colorado and Shelby will be attending the University of Saskatchewan in the fall to pursue her degree in crop sciences. Depending on what the next two choose to do we could end up with all our bases covered. But whatever any of them choose to do we will be proud and Crossroads will always be home.

This past fall Shelby talked us into showing some bulls and selling some females. The kids put in the work and won champion pen of bulls at Edam Fall Fair and sold some females at the Border City Sale in December.

A special thank you to our employees. Claude for putting in the long hours doing multiple jobs for us and keeping everything clean and tidy and things running smoothly. Kirk for his hard work, patience and sense of humour. He knows our herd as well as we do and we are beyond thankful for the pride he takes in his job. Our long time employee Dave has decided to retire at the age of 75. We have been blessed to have Dave as a dependable employee for many years and he will be missed but I'm sure he will be around the odd day and maybe driving a combine come fall. These 3 men are far more than employees – they are family! Also a big thank you to Ian for doing nights. Between Jody's health and our age creeping up on us having a night guy is game changer for us and allows us to still function during the day.

Our relationship with our customers has always been something we put a lot of focus on and many of our customers have become very dear friends over the years. As our daughter Olivia said in an interview for a scholarship, "Good people will attract good people." Treat people well and they will do the same in return. We base our business on customer service, honesty and producing good working animals. When someone puts faith in our program it validates all the hard work we put into producing cattle that work for the commercial producers. Your success is our success.

We are proud of our offering of bulls again this year. We invest a lot of time and energy into researching and trying to produce the best quality bulls that will produce for our customers. We focus on creating great momma cows and calves that will give high returns to our customers. We feel we have something to offer for everyone. Whether you select one from the top of the order or the bottom, they are all very complete and check all the boxes. There is nothing better than hearing how good a customers steers weighed or how nice the udders are on the heifers.

We invite you to come view the bulls anytime before the sale. Take your time in the pens and Jody or Gerald will be available to answer any questions that you may have. If there is a bull or heifer you are interested but are unable to attend the sale contact us or any of the very capable staff from Bohrsen Marketing to bid on your behalf. DV Auctions and DLMS are also available for online bidding.

We are looking forward to visiting with many customers prior to the sale and on sale day. Bull Sale time is the most wonderful time of the year. As always, we invite you to come early and enjoy a home cooked meal and some Crossroad hospitality.

Health

All bulls are under the watchful eye of Dr. Blair Simonson who is a reproduction specialist and more. He is the one we trust to do our all our flushing, embryo transfers, semen evaluations and he is always available to answer our feed and health questions. He is a man of impeccable character and his work standards are at the highest. Our family truly appreciates you Blair.

Crossroad bulls are developed on a TMR ration consisting of cereal silage, chopped hay, super oats and a custom formulated bull supplement. This ration will optimize longevity and ensure proper development from mass and structure to testicle development. All bulls will be vet checked, scrotal measured and semen tested. Bulls were treated with Selon E, Vit. AD, Tolyrazuril, Nasalgen as baby calves.

June - Fermicon7/Somugen, Vista Once;
Sept. - Vista Once booster, Ivermectin & Maxiguard;
Dec. - Sabre for lice, first shot of Fusogard for footrot and a second dose prior to delivery.
Sale day weights will be posted.

We have eight American Red sons for you to choose from this year. We purchased him from North Dakota, chosen not only for his genetics but also his excellent structure that moves so effortlessly. Sons and daughters are equally impressive. Females have great udders and excellent mothering ability. A picture perfect blaze on a cherry red American Red son is a rare find. 168K exhibits a thick quarter, deep middle, and a smooth made front end. His dam 125E has been a reliable producer for our granddaughter Shelby over the years. Two daughters have been retained in the herd, and a full brother to American Wolf was sold for \$13,500 in 2020. His dam carries the great Spartacus bull in her pedigree, power will not be an issue. You could not ask for a better structure, from top to bottom this bull doesn't miss a beat. A quick glance at his above average set of EPDs ensures you a strong set of calves that will fill the bank come fall.

Here is a young stylish American Red son with great colour and a super thick hair coat all on a moderate frame. His dam is another great uddered Full Fleck Bolero dam that has also consistently produced a good calf every year. A daughter was selected from last year's sale by Kulyk Simmentals from North Battleford. This bull's grandam and great grandam were both cornerstones of our program for many years and we have several females that trace back to these bloodlines. A ton of maternal traits makes this a total combo package to take home as your next herdsire.

Here is a February born, solid coloured and super long bodied American Red son. Sound footed, big testicles and a good disposition also add to this good bull's credentials. He was mothered by a consistent producing Bolero dam that has raised a good bull for our sale every year and two years ago a full brother was purchased by Hoffus Stock Farm. We are confident this bull will sire an impressive set of calves and would be an excellent choice to add quality, extra pounds, and profit to your next calf crop.

Here is another long spined bull showing excellent muscling, tons of hair, colour and good scrotal development too. He also boasts above average EPD's, as do most American Red progeny. His young Red Stetson dam had her first calf stepped on so this bull is the first calf she has raised. She has an extremely strong production record from both sides of her pedigree and is bred back for a January calf. Here is a bull with an excellent combination of genetics that is sure to sire some of your best.

Born a 72 pound twin in mid-February, this fella has really done some growing! His dam is a powerful transplant Westcott/Ursula cow that can really feed a calf well. She is bred back to Cinderella Man for an early January calf so good fertility in this bloodline too. Good structure, hair coat and colour along with these proven maternal traits are all qualities you can rely on with this good bull.

Excellent thickness throughout on this February born good haired, solid coloured American Red son. Big testicle size when we measured in early December, so age doesn't seem to matter there. His super uddered Kill Switch dam can really feed a calf well and every calf she's had has been a good one. A full brother and high seller was purchased by breeders from Ultra Livestock and Hay Valley. Be sure to check this guy out on sale day, his many qualities are guaranteed to add profit to your next calf crop.

Great colour and hair on this moderate framed, quiet natured American Red son. His dam gets her smaller frame from her sire, but on the bottom side of her pedigree the granddam is a real powerhouse and great grandam 10 year old Audrey is still here and is due to calve again in January. She has raised several high sellers and her daughters are some of our best. She will be entering our donor program this year. So huge maternal strengths in this bulls' pedigree and a super combination of genetics to buy into. Be sure to check him out on sale day, impressive.

Another good American Red son out of a Full Fleck cow that will always inject some added thickness and that all important money stripe on the face. Unfortunately, frostbite had to touch his ear but that certainly will not affect the quality of calves he sires. His dam is a big time producing Cornerstone daughter that raises top end calves every year. Pllaughter Simmentals from West Virginia purchased a high selling son in 2021. Dobbie Simmentals purchased a daughter and Belle Plaine Colony also bought a son. Here is a bull with adequate muscle and tremendous maternal strength. He is sure to catch the attention of good cattlemen on sale day.

Our only Sysco son in the sale this year and he is a good one! Pictured here in mid-November you can see the qualities this bull exhibits at this young age. His dam is an American Red/ Kill Switch combo, both known for excellent udder quality. Her first calf has been retained in the herd and she is due again for an early January calf. Seedstock is a real complete and well-balanced bull that will be very impressive as he matures. He will be a strong contender for serious cattlemen to assess on sale day. Here is a bull that is guaranteed to deliver.

Some of our strongest producing cows have been sired by our old Slapshot bull. As you can see in this November picture, this bull has a lot of stretch to him, full of meat and muscle from head to tail. By sale day you will be impressed with his overall balance and muscle expression. His super uddered dam is a deep dark red colour, bred for an early January calf which we are sure will also be very impressive. Buy with confidence, here is an investment that will pay high dividends year after year.

Another stylish, super thick Stratton son on a moderate frame that is a real standout in the pen. Shelby twisted her dad's arm long enough and got to take two pens of bulls for the Edam Fall Fair. Showtime was also a pen member that made it into the finals. Kudos to Shelby, Jaici and Cooper for getting them ready and showing them while the rest of the family was busy with field work and other cattle. Cooper says that this is a bull you do not want to miss out on, so make sure you keep your hand up until Auctioneer Steve Dorran says SOLD.

Super stylish one here with his thick red hair coat. Wish we had more of these Strate Up sons for you. Strate Up was a high seller at our 2021 bull sale and we knew we needed to keep some of his genetics for in herd use. This young bull has a loaded pedigree with the Code Red influence and a perfect uddered Stepping Stone transplant dam. She has mothered some excellent progeny; a son was purchased by Weal Cattle Co. and a fancy heifer retained in the herd. Moderate framed, structured well with more than ample thickness and good testicle size is what you will see on sale day. Lots of consistency and predictable genetics here.

If he looks this good in mid-November, he is going to look amazing at sale time! You can't make em much thicker than this and dark red, heavy hair coat and big testicles to boot. Big time muscle expression in that rear quarter, some of the credit goes to the Spartacus in his dam and we all know that the Code Red in the bottom side of his dam's pedigree is no slouch either. Jeff Weal purchased a high selling Sysco son she raised last year and she is bred back to Next Century for a January calf. Here is a real solid choice for your next herdsire.

We have three R Plus Rattler sons for you this year. He has produced some top quality high sellers for us. Here is a deep bodied Rattler son showing his muscle pattern developing in this November picture. It's always nice to see these bulls at this stage in their development and just not on sale day. His fertile dam has always calved in January. We have a very impressive daughter working in the herd and a son was purchased by Crooked Creek Farms. Good disposition on these Rattlers too. Rebel will mature into a dependable bull that will sire an exceptional set of calves.

Make sure you check out this guy's video when they go online in February. There is a lot more bull there than what this November picture shows. He is a performance bull out of a sire we raised and collected some in-herd semen before our sale. He was a high seller purchased by Bergman Family Farm at Langenburg. We also have several sons from this sire in our black division, one is a full brother, same mother just a different colour. His dam is a tank and grandam is the mother of Connected. We have retained all four daughters born to this dam with a couple of them also being full siblings to this bull. Lots of power and pedigree, meat and muscle, he will sire some tremendous calves.

This bull is not only another Connected son but his dam is the grandam to lot 27 too. And as I write I see on the barn camera she is switching her tail preparing for another January baby, this will be number six. She is a super cow leaving three daughters in the herd, one is a full sibling to this bull. Keep back his daughters for replacements. His dam is red, you would think this bull would be solid red but there is some fullblood back there and DNA confirms what the pedigree says. This is an awesome bull, he has a big square rear quarter, is full of natural muscling and moves out well. A ton of proven traits blanket this stylish bull, he will sire consistency you can rely on.

This fancy Red Stone heifer put everything she had into raising this calf and she is bred back for mid-January. Epic is a A.I. calving ease sire used by many breeders in the industry. His progeny are the right kind and popular at purebred sales. Born at 89 pounds this fella obviously had a good milk supply till fall weaning. He has a solid colour pattern, good feet and legs and measured up well where it counts for bulls. He is Homo polled by pedigree. Some real strong maternal traits to throw into the mix to make him one you may want to check out on sale day.

We purchased this bull's polled dam from our friends at Ferme Sibelle in Quebec. She has developed into a nicely uddered female and due with her second calf in mid January. Her full fleck genetics have also added some extra thickness into this young bull's pedigree. His sire is a Sheriff son used for calving ease, so nice when these heifers can have their first one unassisted. A moderate framed bull with adequate thickness, good disposition and that all important money stripe on his face. A real neat package for you to consider on sale day.

This particular bull speaks for himself. An embryo son out of our very own \$100 000 Crossroad Connected and a super producing red momma, this bull has surpassed expectations. Black Contender resembles his father's make almost identically. Big barrelled, early maturing, and a thick hair coat. The genetics backing this bull is something we are very proud of. The Connected progeny have been multiplying quickly in our herd and let me tell you, they are a complete group from top to bottom. A full sister to Black Contender currently sits at the top of our bred heifer pen and boy she is a good one! The amount of shape this bull displays along with that crisp white blaze makes him hard to miss out in the pen. One of the most well put together individuals we have on offer, Black Contender is guaranteed to do good for his new owners. Crossroad Farms will collect in herd semen on this outstanding individual.

This bulls above average EPD's are just as impressive as his physical form. A good hair coat, wide top line, deep fore flank, long body and a muscular hind quarter are all qualities that Black Cash exhibits. A good disposition on this Connected son too. Our black pen this year is as strong as it's ever been and Black Cash adds to the impressive set of black bulls we have to offer at this year's sale.

This is the third bull out of Olivia's many times champion show cow, CRF Diva 425D. Her first calf was CRF Black Bounty who sold for \$14,000 and then CRF Black Stud 216H went for \$7,000. Olivia likes this calf so much she bred her cow back to Connected again for the 2023 calving season. Black Construido was an eye catcher right from the beginning. His body type and style isn't one you can miss in the bullpen. His rear quarter is full of muscle and he is a very well balanced, stylish bull. On both his sire and dams' side there is a tremendous history of perfect udders. You cannot go wrong with a bull like this!

Here is a mid February born calf that demonstrates muscle and power. You certainly must give credit to his good uddered dam for putting everything she has into raising this calf, and she is due with another in January. We have ten Connected sons on offer this year and Black Cruze is most definitely one of the deepest Connected bulls in the pen. Just 92 pounds at birth to big time weaning and yearling weights, his growth curve is more than impressive. Check out his above average EPD's! Here is a bull that has it all, we invite you to come anytime and check him out.

Here is another good structured, deep bodied Connected son. He is jet black and has lots to him including a good scrotal size. His dam is a larger framed cow and raised a fancy heifer that was purchased by Downhill Simmentals from Minnedosa, Mb. Pictured at ten months of age, here is a bull that just looks better and better everyday. Whatever combo you need from a herd sire, Black Combo has it. Be sure to check him out on sale day.

Another Connected son that has a high performance rate for a February born calf. We are very pleased with all our Connected progeny and are very proud to have raised this widely used herdsire. Black Callahan's dam has raised eight calves on our farm and is a long working bloodline. She raised an exceptional daughter that will have her first calf in January and we are excited to continue stacking these new layers of genetics on an already strong foundation. Just so you know, the bull has a unique white teardrop on the other side of his face that will quickly identify him in amongst a black bull battery. We think he will be an outstanding herdsire and play a big part in the future of your program.

Born a 72 pound twin that continues to grow and thicken and look better every week. He is a moderate framed incredibly good haired son of Cinderella Man who is a new herdsire that we purchased walking rights on a couple years ago. We have another son in the red division as Lot 31 and the rest of his progeny are in the replacement heifer pen. We successfully flushed his dam and she is bred back for a January calf, so excellent fertility here. His dam has an excellent udder and she also raised a very good daughter that we retained in the herd. Here is a stylish bull with an above average set of EPD's and a very good disposition. I think he will sire some tremendous females and sons will have plenty of growth, a real good choice here.

Here is an extremely impressive low birth weight, black blaze faced bull. You cannot help but appreciate his depth of body and thickness throughout, wide over the topline and down the rear quarter all on a moderate frame. He has a good disposition, moves out well, and as you can see had good scrotal size in this November picture. We purchased a recipient cow carrying this embryo at the Wilson dispersal. We really admired the Untouchable calves and also this bulls Hoop N Hollar dam who was the high seller at 26,000. We really like this bull and will collect semen for in herd use, we definitely need to put some of these genetics back into the herd. Unstoppable is an outstanding herdsire that deserves some serious consideration.

Here is another Untouchable son that we really like. We also have two full siblings in the heifer pen as a result of embryos we purchased. They have an incredibly good dam and we are excited to move forward with these genetics. This mid-November picture does not do him justice as you can't see how wide and thick he is from the back. He was a member of the Champion pen of bulls at the very competitive Edam Fall Fair where he was admired by many. If you are the successful bidder at the sale, plan to keep a bunch of his daughters for replacements. This bull has some real herd building genetics that will make a difference in what you raise for years to come.

Here is a tremendous solid black bull. He is sired by Crossroad Black Magic who was a bull we raised and collected in-herd semen before he sold at our sale to Bergman Family Farm at Langenburg. We have five black and one red son for you, they are a strong group of bulls. This bull was a member of the champion pen at the very competitive Edam Fall Fair. He is pictured here in November and you can see the herd bull look he carries, full of muscle and performance. His Cobra dam has left us two incredible daughters in the herd and her last years good son was purchased by Shaun Stadnyk from Bruno. Good fertility with all her calves born and another due on the first cycle in January. Shelby keeps bugging her dad that she is so good she should be flushed. We think you could drive a lot of miles to find one this good. If you are looking for Black, here is one to consider.

Black Merchant is a definite power machine. Easily one of the biggest framed black bulls, he is an impressive individual. Born to Shelby's big-bodied cow purchased from Rusylvia Cattle Co, which has yet to disappoint. Her ability to feed a calf has been stellar, Black Merchant is a prime example. The scale read 925 pounds on weaning day August 28th; he will certainly pack a punch into his calves. Black Merchant has acquired the best of traits from each of his parents. Wide-topped, super long-bodied, and measured at 40 cm in early December, he will without a doubt add frame and weight to his future progeny.

Born an 84 lb twin, this bull can really "strut" his stuff, Black Strut is the third pen mate of our grand champion pen of three bulls at the Edam Fall Fair. One of the two black Stratton sons we have on offer, and he is no disappointment. If you are on the look for a calm, easy-tempered bull, he is the one. His dam, Crossroad Elle Livia 51E, is one of the longest-bodied females in the herd. She is a daughter to our Zenna female, which had done nothing but good for us; reliable, large framed, and fed her calves effortlessly year after year. Black Strut will make an easy doing herd bull for his new owners.

It is hard to believe these two bulls are twins. The small birth weights haven't set them back, ultimately showcasing the impressive growth rates from birth to weaning. This moderate-sized black blaze yearling competes evenly with his pen mates. His popular sire LFE Stratton 3094F has earned his place in our herd, producing fancy, thick-bodied calves. Although he may not be the biggest bodied bull, Black Stride makes up for it with his correct structural stature. A solid set of feet under his compact body will make for a long working dependable breeder.

This is the first of four True North sons we have on offer for you this year. We chose him as an AI sire for his calving ease and are very pleased with his calves. This is the first calf from a fancy Madoc daughter that will most likely be entering our donor program this spring as we would like to expand this cow family. The grandam of Black Tracker has raised eight top end daughters, seven are working in the herd and the other is Crossroad Frankie 68F who was chosen as pick of the heifers in 2018 by Scott Bohrsen. When it came time to pick, Gerald (The Master) used all his "so called tactics" to steer Scott away from her but the old boy lost! She looks awesome, we are glad he picked a good one. Black Tracker is moderate framed and incredibly deep bodied with a big rear quarter. He has a good disposition and adequate testicle development too. This is a bull that really interests us and we will collect semen for in herd use. Powerful maternal strengths in this pedigree, a bull with a ton of potential that certainly deserves serious consideration.

As you can tell in this November picture this guy has a herd bull presence look to him. Bigger framed, full of meat and muscle and good testicle size too. This is the only son we have this year from LFE 821G and he is a good one. His dam has raised top end progeny for breeders at Black Gold Simmentals and Pernitsky Farms and a stunning daughter was purchased by Silver Lake Farms at the Border City sale in December. We have one good daughter working in the herd and hoping this one coming in January is also a heifer. Strong maternal influence in this bulls pedigree. We are confident he will go out and sire some outstanding progeny.

A stylish long bodied bull showing balance and thickness throughout. He is structured well and you can see the muscle developing in that rear quarter. He is the result of embryos purchased from Wilson Stock Farm. We also have a fancy full sibling in the replacement heifer pen from this mating that will expand our genetic base building new cow families for the future. As you assess your bull needs, consider this Baretta son, he would certainly have a place in a good herd's bull battery.

We have seven excellent Outlook sons for you this year. Outlook is used widely in the heifer pen, he has been a dependable herdsire for us siring progeny with a good body type, solid colour pattern and his daughters have near perfect udders. Here is a bull that has lots to him considering he was born an 80 pound twin. Heavy muscling in that rear quarter from his Spartacus dam, good testicle size and a good disposition too. He has all the makings of what a good herdsire should offer with the only question being; who will own him?

A mid-February born twin pictured here at a little over nine months that has herd bull written all over him. He is another super stylish Outlook son that is structured well, has muscling throughout with good colour and hair coat and a good disposition too. His dam raised a good bull that was purchased by Robert Svoboda from St. Walburg at last years sale. Here is another good Outlook son that has a consistent package to buy into. He will mature into an excellent breeding herdsire for his new owners.

An awesome Full Fleckvieh bull that we really like, the Outlook and Spartacus bloodlines worked very well again, he has that real herd bull presence look to him. His dam has produced sons purchased by Stolson Farms and Belle Plaine Colony. Ozzy checks all the boxes. He is well balanced with full muscling throughout, big hip and rump. He is super stylish with his good hair, colour and wrap around goggles, showing good testicle size too. A ton of maternal strength in his pedigree, there is no doubt, this bull will sire some tremendous calves.

Here is a Full Fleckvieh Outlook son that has a lot to him. He is very long bodied and full of meat and muscle from front to back carrying that big rounded rear quarter that is a typical Spartacus butt. He is also sporting a good thick hair coat which is sure needed in this miserable cold weather we've had in December. His dam raised a full sister to Output that we sold to Twin Heritage Farms at Sheho, Sk. If you are looking for a bull that will sire some big heavy weights and leave you incredible replacements then put a big checkmark by Lot 64.

Born a 75 pound twin this Full Fleck bull has a powerful pedigree; full of generations layered with our most trusted cow families. Longevity was definitely in their DNA, they just never quit producing. This combined pedigree with Outlook is a real maternal genetic package worth looking into. Plus, you get that natural Spartacus muscling that can't be ignored. We have a full sibling retained in the herd and she is one of our best. This bull is moderate framed and packed full of muscle, he has everything right about him. He is a real quality bull that will compliment any program and deserves some serious consideration.

A real good Outlook son on a bigger frame with genetics from Cornerstone, Spartacus and even some Radium back there, all bloodlines that have produced tremendous progeny for us. His mother has two good daughters working in the herd and a son that sold to Colborn Farms at Delisle. She is bred again for another January calf and we expect she will have years of good production ahead of her. This good bull will sire some fancy thick calves you will be proud of.

You are going to like this one, pictured here at ten months of age he has all the makings of a high end herdsire. Well balanced, looking stylish with his colour pattern. He has a big rear quarter developing with plenty of performance is what you can expect to see on sale day. His dam is the daughter of our Leonard Mark's Pixie cow and can she ever feed a calf! She is due in early January and we are hoping for a heifer to expand this cow family. An excellent combination of genetics here. This bull will sire exceptional daughters and powerhouse sons. If you are the successful bidder on this bull, know that you got a good one.

It has been a few years since we've had a Radium son in the sale and here is a good one! He is super long bodied carrying that big Spartacus rump, big testicles and of course that Radium style, style, style! We use a sprinkle of him every so often to make sure we have enough good Radium daughters working in the herd, they are so reliable. His dam has produced a heifer for Loewen Farms at Osler, a son was purchased by Reid Nichols from Heinsburg, Ab. We also have a daughter retained in the herd and hoping this one born in January is also a female. Here is a good one, don't put your hand down till he is yours.

This year's bulls are a result of breeding two years ago when Jody was recovering from surgery and starting chemo so Laurie had full control of what came out of the semen tanks, sure happy I had this straw pulled out. Here is a real good Full Fleck Crossroad Tuxedo son with an excellent body type, structured well, has good length and thickness throughout. His Spartacus/Cornerstone dam produced a son for Rochfort Bridge Colony and a fancy daughter is due with her first calf in early January. Some older genetics here that worked good back then and by the looks of this bull, they work real good now too. Come check him out, we hope you like him too.

This guy is ALL bull, packed full of thickness on a moderate frame. He is a son of the homo polled Crossroad Pilot. Pilot's dam was a Tuxedo cow that raised several good calves in her lifetime, making this bull related to Lot 69. This bull has quite the mother too, super productive with all eight of her calves born in January except for one. Every one of her sons were purchased by top end producers and two daughters retained in the herd. She will be one of the first to calve in January, sure hoping for another daughter to expand this cow family. Passport will mature into one hunk of bull that will sire thickness in your calves like you've never had before. A real interesting find.

Our thirteen year old grandson Cooper says this bull is a cool dude, and this is his first stab at writing footnotes. Bel Air is our only bull sired by the calving ease Pol Bat Man and we do wish we had more. He was born at 79 pounds to our polled Holland 107H heifer who has been a beauty from a young age. Great cow family here with grandam U'Mora raising eleven January born calves in thirteen years. We sold a Pol Bat Man fancy heifer calf at the Border city sale in December for \$12,000 to Mavv Farms. Bel Air is a very wide bull with a wicked colour/coat. He is so naturally quiet and is a farm favourite. He will raise top end calves with low birth weight and plenty of growth. Cooper does chores and sees these bulls every day, he says whoever buys this bull will have no regrets, so go ahead and put your hand up!

This guy's dam was the high selling bred purchased from Silver Lake Farms at the 2021 Pembina Triangle sale in Manitoba last fall and we are sure pleased with what she brought along with her, he was born unassisted and up sucking in no time. After she calved, we flushed her for eleven #1 embryos and bred her back for another January calf. Pretty fast return on our investment and looking forward to many years of production from this naturally thick young female. Here is Crossroad Motown man sired by Double Bar D Motown, he has eye popping appeal with his colour and style. Born at only 80 pounds and has good performance, has a good foundation and moves out well. A complete package here with proven genetics that could make a real difference in the direction your herd is headed. Have a close look at this one.

Here is a group of younger bulls that we think you are really going to like. They are sired by Crossroad Sangria, a Spartacus son out of one of our favourite and most productive cows on the farm. We have three of her good daughters working in the herd. This bull's young dam is also from an exceptional cow family and she is bred back for a mid-January calf. His grandam is also the dam of Lot 75, so you will see similarities in these two bulls. Here is a mid-February born bull with a 93 pound birth weight and check out his performance! He is super stylish and has that bull look even though he is just a little over nine months old in this picture. Be sure to check out his February video! Big testicles and good disposition complete this bulls good credentials. This will be one impressive bull come sale day, he has a lot to offer, don't miss out.

His dam is a nine year old cow that can really feed a calf well and because of this she was chosen years ago to carry some of our high priced embryos and give them the best chance possible to make it to the top. Mission accomplished; she has had a lifetime of incredible fertility carrying embryos for six years in a row making her our top recipient female. She has mothered some of our best and I guess she's not done yet, look what she gave us this year! Mid-February born and so good! The Sangria big growth EPD's have certainly helped too. This is going to be one heck of a bull when he matures, thick hair coat and natural muscling on this long bodied stylish future herdsire. And the old girl is due to have her ninth calf in mid-January, no lack of fertility in this pedigree. If you pick this bull, you have chosen a good one.

We sure like the Reputation progeny, they are easy doing cattle with natural thickness. We just sold a fancy Reputation daughter at the Border city sale in December for \$26,000 to Westgold, it was hard to part with that one. We have a full sister to this bull going to calve in the beginning of January, udder quality looks excellent on all the Reputation daughters. This bull's dam is due again in early January, she comes from a proven cow family with her dam being the mother of Polled Future and Crossroad Pilot. This bull will be awesome by sale day. As you can see in this November picture, he has lots of muscle expression in that rear quarter and thickness throughout, big testicles and a good disposition make this a very complete package. Guaranteed you will like his daughters and heavy weight sons too.

Excellent temperament on this mid-February born On Point son. He is super long bodied and carries his thickness throughout. He has good hair and colour and looks very stylish with wrap around goggles. His dam is a big bodied Subaru daughter that can really feed a calf well. A good combination of genetics, here is a bull that could be used on a variety of cows with excellent results.

Open Replacement **HEIFERS**

This year we are pleased to offer you 14 open replacement females allowing you to expand your herd with some new and interesting genetics, just in time for breeding season. We have tried to select something for everyone and offer a good representation of our herd. They all come from consistent producing bloodlines with the same sires that in our bull section allowing you to see the strength and potential of their genetics. We are proud of some of the females we have sold at previous sales that have gone on to produce high selling progeny for their new owners. Give us a call if you have any questions, we would be glad to through them with you. Come anytime to view our offering prior to the sale, we always look forward to your visits.

Terms & Conditions

TERMS – The terms of the sale are cash or cheque payable at par at sale location unless satisfactory credit arrangements have been made prior to the sale. The right of property shall not pass until after settlement is made.

Crossroad Farms reserves the right to require a certified cheque as settlement before releasing any sale cattle. Should the purchaser fail to settle for his purchase Crossroad Farms reserve full power to resell the animal to the best advantage either publicly or privately, without further notice. Any loss arising from such resale together with keep and all other expenses shall be payable by the defaulter. All settlements must be made with the clerks of the sale before any cattle will be released. Crossroad Farms and sales staff has the right to refuse bids from anyone who has a previous record of default in payment and who has not made prior credit arrangements, prior to the sale with Crossroad Farms.

BID – Every animal consigned to the sale must be sold by auction. No by bidding will be permitted. Each animal will be sold to the highest bidder.

DISPUTES – In case of disputes, bidding will be reopened between the parties involved. If no further bid is made the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

PURCHASER'S RISK – Each animal becomes the risk of the purchaser as soon as sold.

ANNOUNCEMENTS from the auction block will take precedence over printed matter in the catalogue. Buyers are therefore cautioned to pay attention to any such announcements.

CERTIFICATE OF REGISTRY – The proper Registration or Recordation paper, as the case may be, will be duly transferred and furnished to the buyer for each animal after the settlement has been made.

SHIPPING – Assistance will be given in making shipment after the sale but no risk is assumed by the Seller. Purchasers are requested to furnish shipping instructions when making settlement.

GUARANTEE – All animals will carry standard breeding guarantee as specified by the Canadian Simmental Association. At no time shall the seller's liability exceed the purchased price of the animal.

EXCEPTION TO GUARANTEE – In cases where the animal is subjected to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void. In the cases of bulls, they are guaranteed to breed naturally according to the Canadian Simmental Association Guarantee but no guarantee is given that semen from any bull will freeze.

HEALTH – All animals will have passed the required tests as determined by Agriculture Canada at sale location. It is the buyer's responsibility to determine health requirements for importing any animal into his province or state.

ACCIDENTS – Although every precaution will be taken to protect the safety and comfort of buyers, neither Crossroad Farms or any Sales Staff or Association assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

RIGHTS AND OBLIGATIONS – The above terms and conditions of the sale shall constitute a contract between the buyer and the seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.

PICTURES – By attending our sale you are giving your consent for your picture to be taken and used for promotional or advertising purposes only of Crossroad Farms. If you wish to not have your picture used please advise us in writing immediately after the sale.

Outlook has done such an outstanding job on our farm raising powerful sons and females with awesome udders and superior mothering ability. We knew we had to share some of these good genetics with you. If you want to strengthen your fullblood division, here is an excellent opportunity. Kollins is an impressive, deep bodied Full Fleck female that certainly has brood cow written all over her. Great colour and style and excellent disposition too. Her transplant dam is due to calve mid-January and her grandam is the Umbra donor cow who raised many good progeny for us. We have no doubts that this heifer will continue the tradition of raising quality for her new owners.

Outlook is very strong in the colour department and most often you get goggles too. Here is a fancy, good haired, coloured well Outlook daughter with wrap around goggles and a lot of style. Today is January 4th and her mother just calved a couple hours ago. Some super strong cow families that are in this young dam's pedigree ensure that she will mature into an outstanding female and be an excellent producer for her new owners.

A very attractive deep bodied American Red heifer that was born in March but you would never know she is younger by looking at her. Her transplant dam's pedigree definitely has contributed to her natural thickness. We love our American red females; they have excellent udders and make very good cows. Here is a good heifer with a good disposition that has above average EPD's, she could be the foundation to build a good cow family on.

Every so often we go deep into the semen tank and use something that has always worked. Our Gunner females have done just that. Gunner females make awesome mothers and they can really feed a calf well. This is the first calf from this transplant heifer, we have five full sisters to her working in the herd. Kalifornia will raise the right kind and pay for herself many times over.

Such a little thing at birth, she sure has come a long way. Her WS Epic sire is successfully used by many breeders on heifers with excellent results. They are feminine and stylish and make awesome momma cows. This was the first calf for this transplant dam who just calved again last night. She is also a full sister to lot 84's dam so you can see the similarities between these half sisters. Nice temperament and check out her EPD's, she has calving ease built right in. Some real consistent qualities that should be considered come sale day.

We are sure pleased with our Mr. Flash progeny. He is our calving ease specialist purchased exclusively for the heifer pen and does such an excellent job. Here is Kascade, a dark red, low birth weight, easy doing Flash daughter. I think she has that "good cow look" to her, moderate framed and very stylish. She was mothered by a first calving American Red heifer so you know udder quality will be at the highest. Calving ease and maternal calving ease EPD's on this heifer are exceptional. Lots of different breeding options that would make her future progeny very interesting. Have a close look at this one.

Another low birth weight Flash daughter with an excellent body type and that stunning blaze face. This is the first calf for this heifer with another due in January. She has such a good future ahead of her. She comes from an amazing cow family; I could fill a whole page listing the good sons and daughters the granddam and great grandam have produced. Fancy, and good temperament too, hard to fault. This could be, THE ONE.

This one is a pretty, black blaze full of style and appeal. She is a daughter of our LFE BS Lewis 821G bull who also sired the Lot 59 bull, and what a powerhouse he is! We also have an incredibly good 821G daughter in the replacement pen that is capable of being a foundation female for the future. This heifer's dam is a transplant from the powerful Anna Rae donor cow who certainly made her mark by producing many top sons and daughters for us. Some excellent qualities that you have to admire in this stylish heifer. Here is one you definitely have to check out on sale day.

A super fancy heifer here sired by Crossroad Connected. We have a real consistent group of his sons on offer and his daughters are going to make great cows too. Some of his daughters are our best and the udder quality is excellent on the ones that have calved so far. We like this heifer so much we bred her transplant dam back the same way. She is a powerful Riddler out of the popular Blacksand Linnette donor cow. Kodette is real sweetheart that would be a very nice addition to anyone's herd.

A solid black Connected daughter that is younger but you will never know that by this time next year. With the genetics she has backing her she will mature into one of your finest. Connected's dam is twelve years old and due with her fifteenth calf in January. Some real fertility and longevity here! Kaycee's Bounty Hunter dam raised a very nice heifer purchased by Justin Yasieniuk at last years sale. A real strong cow family in this heifers' background, we are confident she will produce quality progeny for her new owners.

We try to offer a good representation of the herd in our heifer section of the sale. We have such a strong set of Black Magic sons in the sale, it's only right that we offer a heifer calf as well. She is a solid black, moderate framed, good haired with a good disposition. There are a ton of maternal strengths in her sires' bloodlines and also in her Absolute sired dam too. We think she will mature into an outstanding female.

Nobody likes to be last, so I will use this line again; she is just like the last spoon of ice cream in the bowl, simply the best! She is a sweetie, solid black with plenty of capacity, and a nice disposition too. Sired by the impressive Black Gold Approval who was selected for an AI sire in the heifer pen. Mothered by a deep bodied Rattler daughter. Lot 43 is the son of this heifer's grandam. We think this heifer will go on to do great things for her new owners. If you are looking for some different genetics for your herd, this heifer is a real good choice.
