JK Angus is honoured to have this heifer selected for this raffle!

She has been performing well out of a perfect uddered cow and would make a great addition to any herd!

DONATION HEIFER PROCEDURE: The final bid in each round will denote the amount of that bidder's donation. Example: Round 1 - Final bid is \$300.00 to Ryan Smith, Ryan's donation is \$300.00. Round 2 - Final bid is \$250.00 to Tom Jones, Tom's donation is \$250.00. Round 3 - The female is re-auctioned on a downward scale until no further bids are received at the low of \$10.00. Each \$10 purchased (donated) represents one chance in the final draw. (Ryan Smith has 30 chances, Tom Jones has 25 chances and so on down the scale to the final \$10.00 donation worth one chance each.) One ticket for every \$10.00 bearing the contributor's name will be put in the draw barrel. At the end of the sale, one ticket will be drawn with that person winning the heifer. If you would like to purchase tickets before the sale, please contact Cody Nolan at 204-573-4006.

BOARD

A fee of \$6 per head per day will be charged for animals remaining at the Test Station one week from sale day.

US BUYERS

Our sales are conducted in Canadian funds. The U.S. exchange rate will be available at the settlement desk. Upon successful purchase of an animal, the consignors will assist with the necessary documentation, health exams, brokerage and U.S. custom charges necessary to export your animal to the U.S. An additional fee of \$300.00 U.S. per animal will be charged for this service, and is due at time of settlement. Transportation is not included in this amount.

WELCOME FROM THE STATION PRESIDENT

Greetings on behalf the Board of Directors of the Douglas Bull Test Station. Welcome to our 59th annual sale. The Station has to offer you over one hundred bulls, twenty five heifers representing seven breeds as well as the popular ranch horse selections this year. Consignors from Manitoba, Ontario and Saskatchewan have brought their best to the Station to have the performance of their stock evaluated and compared with their contemporaries. The role of the Station is to provide a controlled environment to determine test performance, provide breeder evaluation and a buyer offering from some of the most reputable herds near and far. To this day, evaluation of cattle remains our primary objective along with presenting to the buyer, a performance tested multi breed selection.

This year's seed stock offering is very deep in quality and performance and has set the bar high for next year. Congratulations to the consignors! Buyers, your next herd sires, and foundation females are here at the Station.

We hope you find time to walk the pens prior to the sale, if not, contact the consignors directly, your best source of information will come from that conversation or our station Manager, Cody Nolan (204-573-4006).

"Sustainability" seems to be the buzzword I have heard and read the most this past year. A word that I feel symbolizes the Douglas Bull Test Station perfectly! Cody and the Board of Directors have tremendous pride in this facility. Since 1964, fifty nine sales later, we remain a long-standing tradition and will continue to be a mainstay in this province where the seller and buyer meet.

MANITOBA BULL TEST STATION

WELCOME FROM THE STATION MANAGER

Welcome to the Manitoba Bull Test Stations 59th Annual Sale! Calves are finally at the point where a guy can make some money in the cattle business. It was a great year for producers who were finally able to get some moisture and able to build up their feed stocks from their depleted inventory from the drought from the past couple years. I feel that this may be one of the strongest offerings that we have had to offer right from top to bottom of the pens. The bull and heifers have done very well this year on test. This is the first year that we will have some almost 2 year olds in the sale. There will be 5 bulls available, four Maine-Anjou's and 1 Shorthorn. These bulls are ready to go out and handle a bunch of cows!

This is your official invitation to consign stock for the 2023 test year. We offer developing bulls/heifers, as well as mature bull wintering program and a younger bull development. The development bulls/heifers are delivered to the test station within a 5 day period. Once the cattle arrive, they are on a full vaccination program. The test animals are put onto a warm-up ration for a month. This warm-up period is to ensure that all animals are put onto a level playing field before they begin the test. Once the warm-up period is over; the animals enter a 112 day development period where animals are weighed every 28 days, to ensure their gains are monitored. All bulls and heifers are CUP ultra sounded to determine the carcass characteristics of the animals. All sale animals are run through a breeding soundness evaluation to ensure that the animals that sell will go out to work. There is no better place to develop purebred stock so that they can be compared to many breeders' genetics of the same breed and other breeds from across the prairies and Ontario. This is

HEKEFUKU

a very useful tool to gauge how every breeder is doing and finding traits we are trying to select for to improve the beef industry!

Please do not hesitate to contact Cody or visit the website with any questions that you may have. Follow our Facebook page – Manitoba Bull Test Station to keep up to date on what is happening at the test station.

This bull calf has had the looks of a herd						

This bull calf has had the looks of a herd sire from day one. He is big bodied and muscular and out of a no miss, big bodied cow who ranks in the top 3% of the

breed for ribeye, top 20% for weaning weight and yearling weight and top 25% for fat. His sire is SAV Resource who is in the top 1% of the breed for yearling

weight and ribeye, the top 3% for weaning weight, top 10% for carcass weight and top 20% for fat. No doubt he has the look you are going for, his breeding shows he has the numbers to back it up.

ETONS ANGUS - TERRY WINTLE Oxdrift, ON | (807) 216-6834

This son of SAV Renown has been a pasture favourite all summer. He is one of the quietest bull calves we have ever raised. His father rates in the top 2% for yearling weight and top 3% for weaning weight and ribeye. His mother's quiet temperament and easy-going nature combined with

excellent udder make this bull a pleasure to work around and sets you up for years of excellent quality bulls or replacement heifers.

Sired by Lad 25H who was born in 1976 and was a leading AI sire with Alta Genetics at the time. Known for siring very functional, highly fertile cattle in every dimension. This son 55K will add length to his calves with a strong top line and good structure. He is

recommended for heifers or cows as he is in the top 30% for BW. His dam is a moderate framed female who is in our donor program for a reason. She has 9 calves with a WW index of 108 plus an impressive calving interval of 359 days. He comes with a unique pedigree, he is parent verified and has had no creep feed of any type while on the cow. Just grass and milk!

War cry is sired by the old Battle Cry bull who has sired some very good cattle over the last 28 years. They have been very eye appealing but more importantly just good cattle that work. War Cry's dam is

a picture-perfect tank of a Bismarck daughter that is moderate framed with as much depth and thickness as you can put on a cow. I bought her out west at the

Northern Select Sale in Alberta as my pick of the offering in 2017 and this is her first son she has had to date. I have no doubt War Cry will sire highly functional low maintenance females like his dam and maternal sisters. His sons will be well balanced with good gains while having the eye appeal to top the market! I recommend him as a cow bull. War Cry comes with a balanced outcross pedigree, he is sire verified and he had no creep feed of any type while on the cow. Just grass and milk!

This good Coleman Knight son is very easy keeping and will sire a great set of low maintenance cattle that will simply work in low input environments. Coleman Knight is a true muscle bull being out of the legend RR Rito 707 and out of the great donor cow Coleman Donna

714. His daughters are phenomenal and sons are what the breed needs to maintain good old angus character which has made this breed #1. Convenience

traits at its best with the dam of 31K being a great producer with 13 calves with a WW index of 99 while having a high quality udder and consistently calving as one of the first cows every year. I would recommend 31K for heifers or cows as he is in the top 30% for CED while being in the top 15% for BW. 31K comes with a different twist on pedigree, he is sire verified and he had no creep feed of any

type while on the cow. Just grass and milk!

Portage, MB | (204) 857-6098

to come by. 75K is a good structured bull with a good top and nice hip. He is recommended for heifers or cows with his modest 80 lbs birthweight and being

out of a first calf heifer. He is in the top 30% for CED and top 35% for BW. 75k's dam is an impressive female with a beautiful udder, teat placement, feet, excellent disposition and she is moderate framed with easy fleshing ability built in. She is a direct daughter to our donor cow 35A who has done as good of a job at our place as you can ask of any cow. 75K comes with an outcross pedigree, he is parent verified and he had no creep feed of any type while on the cow. Just grass and milk!

Another blast from the past with a son of the 1976 born Lad 25H. Unique in many ways with Lad on the top side, Basin Payweight 107S smarck on the bottom side. This bull will sire feminine highly fertile

and SAV Bismarck on the bottom side. This bull will sire feminine highly fertile females and his sons will be very docile, functional but not extreme in any way.

Balanced breeding sums this bull up very well. He has good length of spine with a strong top and good depth of body. His dam 29F is a moderate framed, easy fleshing female that is proving to be a real asset on our farm. I recommend 69K to be used on cows with confidence. This bull comes with a rare pedigree, he is parent verified and he had no creep feed of any type while on the cow. Just grass and milk!

An end of April bull that I have admired since birth and feel will develop into a exceptional breeding bull. The bottom side of his pedigree speaks for it self as the Tibbie cow will go down in history as one of or maybe the best cow families in the angus breed. A Maternal brother sired the highest gaining bull in the 2021 test station sale and was the high seller going to Taras Turko from McCreary,Man. with another brother going to Michael Peters from Killarney,Man.

A really well made bull with a big hip and he carries that thickness through out .His tour of duty mother is a structurally flawless power female with a tight udder with nice small teats. This calf is line bred to the Lady Ann cow

family that has made a huge impact in my program. One of the high sellers in last yrs sale was a Blackjack Willy son selling to Aurel Vodon from Virden, Man.

I think he's got a ton of potential and is starting to really come together nice. Powerfully constructed bull that's bred to add pounds and inject strong carcass merits to your calves and also leave you some very productive females. His full brother was the talk of the test station last yr. This calf is out of a never miss cow. Maternal sister is working at Dudgeon's in Ont.

Nice deep bodied calf with same extra style and performance. The dam is a solid producing cow with a perfect udder and teat size. Maternal brother sold in last years sale going to Garry Hamm from Stanley, Manitoba.

These Epic calves sure do grow.With this great performance his EPD's still put him in the top 10% of the breed for calving ease. You can expect his calves to gain like he has. He is ranked in the top 10% for both weaning

and yearling weight. His mom and grandma never fail to produce a prize package every fall. They are the kind of females that have longevity and will be around for years . i believe this big fellow is an all around bull. He will give you heavy thick steers and productive replacement females. He is Homozygous polled as well. Take him home!

This guy is just like the other Epic sons exhibiting calving ease and exceptional performance .His mom OCF 74F is a dark red cow that is hard to fault. She has an exceptionally nice mammary system as do all the females from Rendzvous 618C. He also gave her the blaze face which she has passed on to all her offspring. This polled bull has the money stripe that is

OTTER CREEK FARM - JACK HANSEN Neebing, ON | (807) 627-6185

sought after by many. This calf has generations of sound females in his pedigree. He will give you steers with a little extra class and fancy heifers.

This is a real nice roan Picasso son. He is very wide topped and has a good quarter and depth of body. His young dam traces back to the Gus line being a daughter of a Gussy 24Y son out of the Maid 62 cow that Munroe Lehne had in his herd and raised many top cattle. His dam is a phenotypically good cow with an impeccable udder. She

traces back to the Muridale Sue line which left us many top end offspring and we are retaining the old Sue cow's Picasso son this year to use in the herd to carry on the blood line of her and Picasso.

This powerhouse of a bull is backed by a very productive cow family. Sired by Mark VI and out of a Rama daughter, he is sure to add calving ease and performance to his progeny. He boasts an exceptional ADG throughout the test period along with natural depth and thickness. He catches your eye with his masculine presence and sound conformation. Put him on your Shorthorns to add some chrome or your blacks to make those highly sought after blue roans!

Sired by our new AI sire who's first calf crop for us has been nothing short of great and out of a female who was purchased out of the Western Select Limousin Sale as a calf and has turned into a very visually appealing female. Check out the WW, YW, and Carcass EPD's

on this guy-above breed average in all! Make sure to take an extra look at 95K and admire him for his natural muscling, width, and depth through his middle. This bull just keeps getting better with age. Use 95K on your commercial cows to add extra pounds or turn him out with the purebreds with his outcross pedigree. Herd bull material!

Another bull sired by Cottage Lake Big Star who fits the mold pretty well pretty well with what Big Star has been giving us. Out of a cow we purchased in dam from Campbell's reduction sale who has a lot of maternal power behind her. MTF 53C is a moderate framed cow with a nice udder on her that she has passed on to her daughters that are now in production. Like the other

Big Star progeny, 72K carries the muscle, width and depth that the limousin breed is known for. 72K has above average EPD's in WW, YW, Carcass Weight, and Calving Ease which makes 72K a candidate for the heifer pen but could also cover some cows. **DOUBLE POLLED**

Dark red performance bull here. We reached back in time and used a bit of Anders Poll Cash semen last year and he really clicked with 37K's dam. She's an absolutely perfect uddered half-blood Lim-Flex cow going back to the immortal Soo Line motive. Cash calves know how to grow

and 37K is no different. Turn him loose on a set of red cows and you'll have a set of solid red steers the neighbors will be jealous of.

Heifer bull deluxe. 73lb bw and top 10% of the breed for Calving Ease. 32K is sired by the breed legend TMF Kodiak. Kodiak daughters were a staple in the limo breed for a long time so you can expect strong maternal traits along with the calving ease 32k's dam has brought to the table. She's a strong uddered, docile, 4 year old that I have high hopes for. I retained her bull last year and used him myself.

This April calf was a standout since day one and is packed full of growth and performance. Whisky has stamped everyone of his heifers with a flawless design and 27K is no exception. Deep bodied and wide topped in a very feminine and clean package. Her dam, Herbourne BGG Doris 6B does an exceptional job each year and is one of the easiest keepers we have in the herd with an outstanding udder. We truly believe that this is the type of heifer that anyone can build a herd around, bid with confidence on this one!

Here is a heifer we've debated keeping since the start but with her potential to be on a halter we are giving you the opportunity to own her! Another true representation of the Whisky heifers right here. Extra length and muscle in a very flashy roan package! With MLSF 5901C in her pedigree, you just know she will work. She was our first papered female we

purchased and has been the blueprint for the heifers we hope to continue producing. She has truly been one of the easiest keeping cows on the farm with great feet and a perfect udder while possessing all the maternal instincts you want one to have! This one was from the top of the herd and your not going to want to pass her up!

We purchased the dam of this heifer from Paintearth Shorthorns a few years back and she has produced 3 heifer calves to date all of which have been top heifers. She is a no nonsense cow that lays down and calves each year no problem. The female line has been a top producing family of females

at Oram's for years. The Picasso bull is no longer here so daughters will be few and far from here on so grab on while the opportunity exists.

Moderate framed, reasonable birthweight, predominately solid red factor colouring, especially on the dam side. Her 6 year old dam has proved herself: excellent udder, sound, easy fleshing, excellent feet and legs. Just like her daughter in the sale exhibits characteristics for a long,

productive life. With Crooked Post Grissom as a sire and the performance of the females on her mother's side, there is nowhere to go but up in the performance of her calves. Cycled early and is ready to go right to work for her new owner. She is tested negative to all 3 variants of Myostatin.

POLLY

2016

Buddy is a home raised 2018 gelding that stands 15.1. Buddy has very good feet and bone, this in your pocket type horse has seen a little bit of everything. Buddy has been used lots moving cattle around, and has been rode down the side of the road, and rode around farm machinery. We have rode lots of colts out of his dam, and have been very good horses that turn into great rope horses.

Polly is a 2016 registered mare. She's a gentle mare standing around 15'2 hands, weighing around 1050lbs. She's a big stout

She's been used to check, sort, and move cows and doctored a few last summer. She's tracked the machine and some slower calves in the arena. Polly has the size to make a good ranch horse

11 year old appendix 16.1 hh done all aspects of ranch work has roped the skid on the head side wears a number 1 shoe.

## PEPPA

2019

MARE

"Peppa" is a 2019 APHA registered mare. She is solid sorrel except for one white spot on her belly and white socks. She has had some cattle doctored off her in the pasture and moved and sorted cows lots. She's really quiet and easy to get along with. She's roped the machine lots and just starting her career roping live cattle in the arena. Will continue to use her on the ranch calving and roping in the arena until sale day. She stand about 15 hands. Any questions or if you'd like to try her before sale day give us a call at (204)851-5466.

CONSIGNED BY: ORY BROWN (204) 851-5466

"Emma" is a sorrel 4yr old mare. This kind little mare has done everything around here from pulling kids behind her on a toboggan, branding calves, taking beginner riders along on cattle drives and catching the odd stray calf. There isn't much she hasn't seen or done. She's breakaway roped a handful of calves out of the box and is also started in the heading. She's roped the dummy lots and feels like she's going to make a pretty awesome little highschool rodeo horse for someone. This mare has a nice disposition is easy to catch and have around and nothing seems to bother her. For more info or to come try her out before sale day please call Justin at 1-204-734-8473

## SALE TERMS & CONDITIONS

The terms of the sale are cash or cheque at par to the Manitoba Beef Cattle Performance Association Inc. (M.B.C.P.A. Inc.). The buyer assumes all responsibility of his/her purchase at end of said purchase. The M.B.C.P.A. Inc. cannot be held liable after the sale clerk has recorded the buyer's bidding number on the sale receipt. All settlements must be made with the settlement officers of the sale in the office before any cattle will be released. Phone bids welcome. Please contact the Test Station to arrange telephone bidding.

All bulls purchased may be left at the station until convenient for pick up at purchaser's risk by signing a form in the office. One week free board, \$6.00 per head per day after. Please inquire at the Test Station office for details. Livestock insurance will be available from HMS Insurance at the Station on sale day and is strongly recommended to be purchased. The guarantee on a bull is between the buyer and seller. The M.B.C.P.A. Inc. will act as a mediator in case of dispute. To protect both buyer and seller, a non-breeding bull must be reported to the seller within six months of the date of sale or according to the Breed's Code of Ethics. The seller will not provide replacement or credit for physical injury or mismanagement. In the event that your bull is a non-satisfactory breeder, the seller will not under any circumstances, be responsible for more than the original selling price of the bull.

### **Decision Deferred Bulls:**

A Decision Deferred Bull (DD Bull) is a bull who has not received a satisfactory semen test. About 45, 60, and 75% are expected to pass at 12, 13, 14 months of age respectively. A DD bull is usually a sign of immaturity and will most likely receive a Satisfactory passing with time. Any bull sold in the Manitoba Bull Test Station with a DD breeding soundness evaluation must still be above 50% normal and the veterinarian is confident that he will pass with time. If a bull is purchased in the sale, the purchaser will pay for the bull sale day and the funds will be held in trust. The bull will stay 4-6 weeks (dependant on veterinarian suggestion) at the Manitoba Bull Test Station and then will be retested at this time. If the bull receives a satisfactory grade, the purchaser can come pick the bull up and the cheque will be deposited. If the bull still does not receive a Satisfactory passing, it will be based on the suggestion of the veterinarian and consignor of how to proceed with the bull. Feed, yardage and semen retest will be the responsibility of the consignor until the bull reaches a satisfactory semen evaluation or other arrangements have been decided upon.

The Manitoba Beef Cattle Performance Association Inc. is only providing a service in providing this sale; persons attending this sale do so at their own risk. Sale catalogues will be available at the sale and copies of the registration certificates on file will be available at the office. Visitors may inspect the bulls at any time prior to the sale. If errors are noted in the report or in the sale catalogue, corrections will be made from the auction stand, and will take precedence over any printed matter.
