

Welcome to our 12th Annual Bull Sale that we have hosted at Mar Mac Farms. We are a fourth Generation family run farm, where everyone is involved in the day to day operation.

Brett is involved in the day to day operation of the farm along with owning his own cattle and crop land. Brett has recently been selected to be the Young Cattleman's Council, Manitoba rep.

Melissa owns and operates Prairie Pistol Designs, a graphics design and marketing company that designs ads, websites and catalogs along with cattle photography and videography.

As we look forward to 2016, the cattle industry saw some of the top dollars ever paid for calves and cull cows in 2015.

Although the market has leveled off, we must still appreciate the strong prices we are still receiving for our livestock. Top end calves are bringing around \$1300-\$1500. per calf which is still a good investment in the livestock industry.

At Mar Mac, we are very proud of this strong set of beef bulls. As you can see in all divisions, Mar Mac has worked hard to achieve some outcross genetics along with calving ease and power potential herd sires. You will be able to access all your herd bull needs with these options.

These bulls have been through a strict culling process with structural soundness, ease of fleshing, and disposition taken into consideration. Any of the bulls in the sale we would use in our program. We would like to retain the right to collect 200 straws of semen for our own use in our own herd at your convenience and our expense, on any of these bulls.

Cow families are very important in our program as you can see in this book and our fall female sale; these families consistently produce top quality livestock. The cows are not pampered they have to calve and breed back or they do not stay around.

This is the second year; our bulls are on a complete silage ration, to enhance longevity and soundness. They are athletic, loose hided and have lots of hair. You may find fatter bulls at other sales but these boys are fed to last.

We are pleased to work with sale consignors: Perkin Land and Cattle Co. and Bruce McRae of Angus Valley Farm. Angus Valley bulls were fed at Mar Mac.

Hosting a sale takes lots of hard work and we would like to thank our friends and neighbors that have helped us out over the years.

We look forward to meeting with you on sale day, although we can not visit with everyone, we would like to thank you for attending our sale and supporting our program.

Blair, Lois, Brett and Melissa McRae

p.s. Join us for a tasty Roast Beef Lunch at noon. Our sale barn is heated but the bulls are on display outside, so dress accordingly.

VIEW CATALOGUE AND VIDEOS ONLINE AT WWW.MARMACFARMS.NET

Give Mar Mac or any other of the consignors a call anytime... Call us a few days in advance of the sale with your bull needs and we will compile a list of bulls that we feel will work for you. As we are with the bulls everyday, we know the qualities in each bull. If we buy a bull for you sight unseen and you do not like him, you don't own him - no problem! Don't forget to check out the videos!

At the Mar Mac and Guests Bull Sale our fifty plus years of experience as a family run operation

means CUSTOMER SERVICE is an important part of our business. We guarantee our bulls 100%, sight unseen purchase satisfaction, wintering program, personal contact after the sale of the bull and the coffee is always on for you to come and view our program.

## WE CAN SUPPLY YOU WITH QUALITY BULLS AND CUSTOMER SERVICE

#### **BULL GUARANTEE...**

All bulls have completed a breeding soundness evaluation. If your bull fails to be a satisfactory breeder, we will replace him with a bull of equal value or give you your money back. We guarantee you will have a sound bull to service your cows. We will not provide a replacement if your bull has been miss managed. At no time shall the liability exceed the purchase price of your bull. Bulls under one year of age on semen test day will be tested after their birthday, before you need them.

#### **CALVING EASE SCORE..**

We evaluate each bull for calving ease determined by bone size, birth weight, birth weight EPD and profile. Scoring is as follows:

••• Recommended for use on moderate framed first calf heifers, of same breed. Should produce minimal or no calving trouble. •• Recommended for use on large framed first calf heifers & cows. Should produce minimal or no calving trouble. • Recommended for use on cows. Should produce minimal or no calving trouble.

#### DELIVERY

We offer to board your bull free until April 15, after that at cost until you need him. AS WELL, WE WILL DELIVER YOUR BULL FREE TO CENTRAL POINTS IN WESTERN CANADA OR THE US BORDER AND COST WILL BE SHARED TO EASTERN CANADA. We will make every effort to get the bull to your farm. Delivery will be as close to the date you request your bull, but will be at our convenience. If you want to pick up your bull at the farm, you can save \$100 off the purchase price. If you can not take your bull when we are in your area, we would appreciate if you made arrangements to pick up your bull.

#### PIECE OF MIND

Your new bull is a valuable asset and we recommend insuring your bull for infertility coverage and all risk mortality. If you are taking advantage of our wintering program, your new bull must be insured so we both have peace of mind. Insurance will be available from Keystone Livestock Services.

#### ACCIDENTS...

#### Although every precaution will be taken to protect the safety and

comfort of the buyers, neither the sales staff, auctioneer or consignors assume any responsibility in this matter and disclaim any liability, legal or otherwise, in the event of an accident or loss of property.

#### TERMS...

The terms of the sale are cash or cheque payable in Canadian Funds. The right of property shall not pass until after settlement is made. All settlements must be made with the clerks before any cattle are released.

#### MAR MAC FARMS & GUESTS RESERVE THE RIGHT TO DRAW SEMEN ON ANY BULLS IN THE SALE FOR THEIR IN HERD USE.

Check out the video of Ribeye at www.marmacfarms.net to see the agility and stride he has for an 8 year old Red Angus bull!!! We are so impressed by how docile, free moving, structurally sound and thick topped Ribeye is. A number of the Red Angus bulls are out of Ribeye females. It will be very hard to replace Ribeye as no matter bulls or females, they worked.

Outcross genetics and what a package. We retained Spartan to use in our program. His sire, Blackberry, left a strong set of bulls and boy what a set of females he left at Mar Mac. Blackberry's dam is our Donor female McRae's Bridget 125T(sired by Stevenson's Bruno). On the dam's side, when we purchased the Buck Valley herd one of strong cow families was the Siera line. To produce some outcross genetics we bred Siera to the beefy DMM Makin Waves sire. This combination has resulted in Spartan. So you will have to drive many miles to find a sire with these outcross genetics, along with the performance, and strong maternal strength. Wow what a set of bulls he left for the first calf crop.

Prowler was selected to add length, width of top and strong maternal traits. His females are really making a mark at Mar Mac and another strong set of sons sell this year in the sale.

# CUSTOMER SATISFACTION **JOE & AMANDA BOUCHARD**

We run a large black angus commercial cow herd in the North Interlake. We have bought 5 black angus bulls over the last couple years from Mar Mac and have been very pleased with our purchases. The bulls are solid, long, deep and wide and have great feet on them. They transfer these traits to their calves well and the calves package and weigh up well on sale day. They are easy calving and the calves are aggressive and up and nursing quickly on their own. The heifer calves are quiet and have great feet and udders. I appreciate the passion and philosophy at Mar Mac on producing top quality low input seed stock and that the problems belong on the truck. We plan to continue to source bulls from Mar Mac for our farm.

Blackberry was no accident. When you mix the genetics of a Mulberry grandson with a productive female like Bridget 125T, things can get exciting. We flushed 125T and many of her sons are in the sale. We do not flush just any old cow, at Mar Mac it has to be a proven, no miss female that we can build a herd around. Blackberry himself is such an impressive individual and wow what a job his sons and daughters are done.

The Cedar Ridge son out of donor female 125T that we are using in our program. Watch for his sons in 2017.

A young Tiger grandson, three year old who is leaving some thick meaty offspring see sons in this sale!

Mar Mac bull program has been developed using the highest amount of silage and hay in the ration along with grain and supplement to achieve the energy and protein requirements they need to develop. The program is designed to achieve optimal gain, lean growth and skeletal frame but not to have excess condition on the bulls. The supplement used is the Nutre Beef Bull Developer Supp which enhances fertility, testical size, hair growth and foot health.

	74	718		2.3	54	92	19	46

Just before A.I. season in 2014, I called Chris and Shane to ask what new up and coming bulls they would recommend. They highly recommended Mohnen South Dakota. I believe the words were "Don't worry about it, just breed all your cows to South Dakota". Look at this bull now, I wish I had taken their advice! 21C's dam was one of my foundation cows, and I was sad to see her go to town at 11 years of age this fall. Owned by Brett McRae Boy what a job KOF 9T has done in the Angus breed. She is one of the females that made the criteria for Premier Dam since 2014. What an accomplishment!!! She has offspring working at Larry Heinrich, Black Hawk Angus, Blair and Bobbi Rankin and females at Mar Mac.

#### Premier Dan Criteria

1. The cow must be enrolled in the Canadian Angus Performance Program.

- 2. The cow must have a calf with a 205-day weight recorded within the past 18 months.
- 3. The cow must have her first calf within 1000 days of her date of birth
- 4. The cow must maintain a regular calving interval, calving within 395 days consecutively
- 5. The cow must have four consecutive natural born calves that are registered
- 6. The cow's four calves must have Weaning Weight EPDs that are above
- breed average and have an accuracy of over 25%
- 7. The cow must have at least two registered grand calves
- Once a cow is designated a Premier Cow, she is always an Premier Cow, however she will not be published in a year where she does not meet the above criteria

This is a bull that will offer moderate birth weight, combined with lots of power and performance. 163Z's bull sold in last years sale to Keith and Nadine Wohlgemuth for \$6500. Owned by Brett McRae

156Z is another cow that I purchased at the Johnson/Fertile Valley Female Sale. She may not be the "prettiest" cow in my herd, but she is reliable, consistent and so quiet you can walk up and scratch her in the pasture! I used 170A as a my natural service sire and I don't think I could have picked a better bull! I am very happy with his calves. They have sounds structure, lots of capacity, and good docility. Unique describes this Angus bull. Melissa was impressed with the ease of fleshing and correctness in the Rex bull when she was in New Zealand, so we decided to try some semen out on a Scottish bred female sired by Commander Bond. This bull we feel should work great on the heifer pen. Moderate framed and easy keeping Angus bull here.

Boy this 3 year old female, 8Z, just never stops bringing in those top calves. Her first son was a feature last year and sold to Scott Livestock and this bull is full of meat and eye appeal. Chunk's great grand dam is the Premier Dam 9T.

# ANGUS VALLEY FARMS BRUCE MCRAE -- MANITOU, MB -- 204-242-4502

First, I would like to Thank Mar Mac Farms for allowing me to be part of this Bull Sale. I am very proud to be bringing the old family farm name "Angus Valley Farm" back to life, with a small herd of Black Angus cattle.

# **EPDS - EXPECTED PROGENY DIFFERENCE**

The expected difference in performance of a bulls progeny when compared to the average progeny performance of all bulls evaluated. EPD's cannot be compared cross bred. Breed Averaged are at the start of each breed section.

CE CALVING EASE - percentage of unassisted births with the more positive number indicating greater calving ease. BW BIRTH WEIGHT - the birth weight of a bulls progeny when compared to the breed average, in pounds. WW WEANING WEIGHT - the adjusted weaning weight of a bulls progeny when compared to the breed average, in pounds. YW YEARLING WEIGHT - the adjusted yearling weight of a bulls progeny when compared to the breed average, in pounds.

- M MILK a measure of amount of pre weaning performance gained by calves which can be attributed to the milking ability of a bull's daughters. The EPD is expressed in pounds of calf.
- **TM TOTAL MATERNAL -** each of these terms measures a sires ability to transmit milk production and growth rate though his daughters. It predicts the weaning weight of a sire's daughter's calves. If is equal to the milk EPD plus 1/2 of this weaning weight EPD.

Welcome once again to the Mar Mac bull sale. Talking to the many producers that have invested in our genetics at this bull sale over the years, we feel we are on the right track of mixing performance and calving ease to produce the kind of offspring that are lively at birth and can go on to grow into marketable cattle as well as have replacements with longevity and functionality in their herds. At PLCC our herd has grown to 140 young cows that have produced this exciting group of bulls on offer. With AI, ET transplants and using some very good walking bulls we try to move our breeding forward every year. We invite you to come and view the cows and the bulls on offer anytime at PLCC, and all bulls will be pictured and videoed on our website. We would like to retain the right to collect 200 straws of semen for our own in herd use at your convenience and our expense on any of our bulls. See you at the sale.

PERKS

#### **HOMO POLLED - RED - PUREBRED**

A deep red KWA Big Time son that is sure to have many friends sale day. We were very impressed with his sire when he sold at Ashworth's, we took a big swing but did not bring him home that day, however we did buy a semen package after. BAM! This guy has the same look as his old man. A bull with regal presence, big rib dimension and an overall appeal, as well as strong performance and carcass EPDs and a big ribeye, measuring almost 17 inches. His maternal sister born last year is one of our top bred heifers. This mellow bull has the power and the pedigree to make a difference in many herds.

#### HETERO POLLED HETERO BLACK PUREBRED

What more can I say about this genetic combo that hasn't already been said in past years. Once again the 680S x Doll is the performance bull in the pen, ranking number one for adjusted yearling weight, weight per day of age and average daily

gain and in the top 1% for ribeye. He scanned a 16 inch actual ribeye and was in the top 10 for %IMF. He has a presence and pride when he walks about the pen.

The 680S hip and hair is ever present in this calf. Full brothers have sold as top prospects thru this sale, in 2013 to Dana and Meagan Johns, 2014 to Art Johnasson and 2015 to Wayne Heinricks, averaging well over \$8000. This bull has herd bull written all over him. Don't miss out on one of the last of these ET calves.

#### **HOMO POLLED - RED - PUREBRED**

WOW! Where should I start with this big barreled rascal. As you can see he goes back to the Doll cow making him a bit of a special red pedigree. All year he has been one of the stoutest bulls on pasture and in the yard. He should go on to breed this tremendous performance in a moderate frame, as his adjusted YW is 1431 lbs. His hip and top are an easy give away to his excellent carcass credentials. His mother is a must see cow, perfect udder and stout. Her heifer last year is our #1 bred heifer. Don't let this Dr. Phil prospect get away.

#### **HOMO POLLED - RED - PUREBRED**

A very complete Big Time that I really like. He is hairy and long spined and very square on the corners, with great carcass EPDs and ranking in the top 10 for %IMF. He is definitely a bull that you will find sale day.

#### **HOMO POLLED - RED - PUREBRED**

A long bodied, cherry red calf that comes out of an Agribition high selling heifer from a few years back. He has tons of good hair and excellent testicle development and is probably the quietest bull we've ever raised and ranked in the top 10 for %IMF. Take a chance on this guy, he's sure to be a home run.

#### **HOMO POLLED - HETERO BLACK - PUREBRED**

A different pedigree for our farm. We purchased a group of cows from 5Corner Cattle. His mother, a Ceasar, is a well made cow with a good udder. Wes told us she has often made top bulls, I think this guy would fit that bill with an adjusted YW of 1403lbs and an ADG of 4.34 lbs/ day. He also ranked second for %IMF and has a 16 inch ribeye. A very attractive guy with lots of middle.

#### **POLLED - RED - PUREBRED**

A really powerful red El Tigre. Strong topped, long spined and very well muscled, this bull has an adjusted yearling weight of 1563 lbs, a weight per day of age of 4.03 lbs/day, an average daily gain since weaning of 5 lbs/day and a 17 inch ribeye! A calf that is deep red and structurally correct and has lots of maternal with a Shear force mama. This calf will sell without papers but is every bit a top quality calf.

#### **POLLED - RED - PUREBRED**

A really good cherry red El Tigre with a bomb proof temperament, out of a long, productive Powerline cow. The dam has raised a bull for Stan Rampton and also the pick of our heifer calves that we sold to 5 Corner Cattle Co at the Pembina sale. No guess work here, some very maternal genetics that should breed true.

Mar Mac Farms & Guests Bull Sale

#### **HOMO POLLED - BLACK - PUREBRED**

Our good ol' Shear Force cow has produced another dandy bull with extremely balanced EPDs. The one and only Wallbanger in the pen, he has had such an impact on the breed. A good footed bull with ample testicles, his adjusted weight is 1472lbs and he's gained 4.77 lbs/day on test, all with a calving ease EPD in the top 20%. Here is one that should go out and cover some ground and leave tremendous females.

#### **HOMO POLLED - HETERO BLACK - PUREBRED**

Plain and simply...A HERD BULL! Outrageously long spined, big spring of rib, deep quartered with tremendous performance. Many visitors immediately take notice of this fella when they are in the pen, he moves so smooth. His mother has a very nice udder and has raised some top prospects. This is her 4th calf, the others were 2 bulls that have sold to Don Dickson and Melvin Dunn and her only heifer was an absolute standout of the 2013 born heifers that we kept in our herd. Many producers would love to have a pen full of bulls like this guy, especially considering his adjusted yearling weight of 1539 lbs, his weight per day of age of 4.11 lbs, his ADG of 5 lbs and his 17 inch ribeye. Take him home he's really just that good.

#### HOMO POLLED - HETERO BLACK - PUREBRED

A real sale feature. This El Tigre calf has the presence and style of a breeding bull. With a picture perfect moderate Dr. Phil mother this guy is sure to breed sound structured, stout cattle, and it doesn't hurt that he's gained 4.5 lbs a day since weaning. Deep quartered, big hip and rib, moving up into a smooth shoulder, this guy is as fluid in his joint movement as they get. Serious cattlemen take note of this important breeding piece.

#### **HOMO POLLED - RED - PUREBRED**

This good red bull has tremendous rib dimension and to no surprise his mother is a soggy tank that we are currently flushing. A bull like this should sire calves that push down the scales, as he's gained over 4 lbs/ day since weaning.

#### **POLLED - RED - PUREBRED**

One of the deepest sided red bulls in the pen, he often gets noticed for his dark red color and stoutness by everyone who visits. He is proud headed and has excellent testicle development. A bull that will add some soggyness to his progeny, as well as performance, as he's gained 4.5 lbs/day on test and has a 16.8 inch ribeye. This is the first bull that this cow has had, but we've kept 3 daughters and sold a full sister to Storbo farms at the Pembina sale last fall. Make them red, make them stout, make this guy yours.

#### **HOMO POLLED - RED - PUREBRED**

A big performance Hot Iron calf here with a Colossal mother who was another performance bull for us. Hot Iron has really bred well for us, putting more performance into his calves than we expected, being as moderate as he is. Push the scale down with calves from this herd bull prospect, as he was the second highest gaining bull with an adjusted yearling weight of 1529 lbs, a WPA of 4.07 and an ADG of 4.77 lbs/day and ranked in the top 10 for %IMF. I think I would have to put this guy near the top of my picks for the group.

#### HOMO POLLED - RED BLAZE FACE - PUREBRED

A young bull but a darn good one. His mother came out of the Keystone sale and she has really done a fantastic job with this Hot Iron calf. Peak polled and easy fleshing, his adjusted yearling weight of 1479 lbs puts him near the top of the pen. A bull that will have commercial guys lined up for this blaze faced package on sale day, he has a weight per day of age of 4 lbs/day and an ADG of over 4 lbs and was third for %IMF.

The youngest bull in our sale offering, his mother is a fantastic young Red Ace cow that puts a bit of style in her calves. He is a correct, easy moving bull that should sire an impressive group of calves. His grand dam has put 3 bulls through this sale and this cow looks to be on the same track.

#### **HOMO POLLED - HETERO BLACK - PUREBRED**

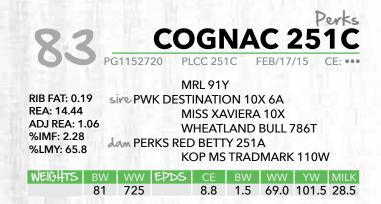

A super stylish Dusty calf out of a first calf heifer. We are really impressed with the structure and stoutness he has for a low BW calf. He is square topped and has his mother's 680S hair, and excellent milk and carcass EPDs and ranked in the top 10 for %IMF. I think the new owner will be very pleased with this bull and his offspring.

#### **POLLED - HETERO BLACK - PUREBRED**

Cool pedigree here! A really solid Dusty calf out of a full sister to all those good 680S x Doll bulls we have sold over the years. Good maternal and carcass numbers and a moderate BW, and was third for %IMF Not to mention he is one of our younger bulls. I would like to see this guy as a 4 year old, he could be one of the most impressive ones to come out of our group.

#### **HOMO POLLED - RED - PUREBRED**

A calving ease bull that has a lot of depth to his pedigree. His dam is a full sib to the dam of Lot 65 and they are both daughters of the dam of lot 76. This cherry red bull has very balanced EPD's, lots of milk and should work well on heifers.

#### **HOMO POLLED - RED - PUREBRED**

A smooth made, cherry red Dusty son out of another beauty first calf heifer. She is a very impressive, good uddered Dynamite cow whose mother came out of the Pembina sale. A calf with extremely balanced EPDs that should go right into the heifer pen.

#### **POLLED - RED - PUREBRED**

This Bonchuk bred bull is a very moderate red rascal, that would work very well in the heifer pen, being in the top 1% for calving ease. He has a tidy head and a smooth shoulder. Don't miss this guy he's a good one.

#### **HOMO POLLED - RED - PUREBRED**

This Red Mountain calf is just what we expected Red Mountain to do on a first calf heifer, low BW and short gestation. His mother is a deep red, good uddered heifer that came from Oakview at the Pembina sale. We think this big bodied bull would be a good heifer bull candidate or leave very good calves on cows as well with his 4.46 lbs/day ADG. He was also the top bull for %IMF.

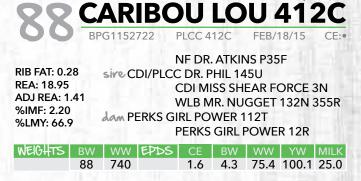

#### **HOMO POLLED - RED - PUREBRED**

Another calving ease bull - 77lb BW wrapped up in this good performing, heavy haired package. Dr. Phil can really stamp them with his curve bending traits, dark red color and strong marbling and ribeye EPDs, he was in the top 5 for %IMF. He is one of 2 bulls out of the 8 full sisters we have from Hard Rock and Mader's Blackgold 110S cow. Take a good look at this one, not much to pick holes in.

#### POLLED - HETERO BLACK - PUREBRED

Power runs deep in this guy, his mother is one of the most powerful cows on the farm. A super long spined bull that moves very well, he has excellent ribeye and marbling EPDs, and his actual ribeye measured a whopping 18.95 inches! Check out his low BW to his performance, a definite curve bender.

	84	850		12.7	1.5	74.0	106.7	33.9

#### **HOMO POLLED - RED - PUREBRED**

A pretty neat calf when you consider the shortness of gestation and the superior calving ease he has. His sire proved to us that he was tremendously consistent in gestation averaging less than 280 days. If you want guaranteed calving ease....then shorten gestation. To add to this, his Hard Rock mother is one of our top prospects for up and coming cows in the Doll cow family. This bull ranks in the top 25% or higher for the entire breed in calving ease, birth weight, weaning weight, yearling weight, maternal calving ease, maternal weaning weight, milk, ribeye and marbling EPDs! A bit extra frame in a heifer bull.

#### **POLLED - RED - PUREBRED**

These Godfather calves have very low birth weights for such a powerful sire and they are consistent in gestation and type. Big ribbed and tidy headed, this calf should be able to go on heifers or cows with exceptional results. His mother has had 5 calves and averaged 74 lbs on birth weights and his birth weight EPD is in the top 4% of the breed.

#### HOMO POLLED - BLACK - PUREBRED

These Dusty's are shaping up to be very nicely made bulls with low birth weights. Analyze him - square on all corners, good hip, and an attractive head. His mother is one of 8 full sibs we have from Mader's Blackgold 110S cow, a cow that has produced many top sellers and show prospects. Look deep in this pedigree to find greats like Shear Force, Crosby, Gunner, Dynamite Black - a list of "whose who" in the red and black Simmental world. He's a good one, with a flawless set of EPDs.

#### HOMO POLLED - RED - PUREBRED

We sold several full brothers to this guy last year as we flushed his mother, and have been very happy with the results as heifers or bulls. They are fluid moving calves with low BW. Yes it is correct at 64lbs. The 5 full brothers over 2 years have averaged 82 lbs. Here is a chance to get one out of a beauty of a cow.

Mar Mac Farms is a family Run Operation and during the year we require some additional help wile we are at shows and events. Special thanks to our 2015 help; Jessica Hobbs, Tyson McRae, Gracie & Katie Falconer, Amanda & Greg Woychyshyn. We could not achieve our goals without the help of our family, friends and neighbors in the Roseland Community.

> A Special thanks to everyone who took time out of their busy schedules to support our family and the Mar Mac Farms and Guests Bull Sale

# THANK YOU TO OUR 2015 BULL SALE BIDDERS, BUYERS AND SUPPORTERS

See you down the trail!
