BULL SALE

THURSDAY, MARCH 9, 2017  
AT THE SPRING CREEK SIMMENTALS RANCH

Welcome

On behalf of our Spring Creek family I welcome you to our annual In Pursuit of Perfection bull sale. As I once again sit down to share my thoughts with you what comes first to mind is that our bull selection and diversity has never been better. Whether you are looking for a red or black, Angus, Simmental or half-blood, blaze or solid color, calving ease or performance, we have it all here. We start off with a very interesting Lot #1 prospect. He is a red '56U' son with a blaze face whose pedigree screams maternal. I believe that Spring Creek genetics are right for the times and as leading edge as you will find. The ninety bulls on offer have withstood three different culls, as we made more steers this year than we have in a long while. I can honestly say that this is the quietest group of bulls that I have ever offered. I am satisfied with how the bulls are developing, and that as a group they represent my exclusive genetics. I invite you to select with confidence.

All of our purebred bulls are identified for polled and color status. This will be one of the largest offerings of homozygous polled bulls and homozygous black bulls available in Canada. I feel that it is necessary to have the bull's genetics identified so that customers know what they are buying.

Our Angus section is the largest and strongest to date. I am known more for my Simmental cattle but there are definitely breeder bulls available here for the Angus seed stock industry. I invite interested parties to study the depth and quality of my Angus cow herd as I am proud of the Angus herd that we have developed.

I believe that the strength of my operation lies in the cow herd. As my repeat customers know, I've been working on genetic improvement for over four decades. I am satisfied that my bulls come from proven cow families with consistency and prepotency. Forty years of careful selection and breeding is paying off in females bred to work, perform and pay their way. Once again, you will see some birthweights that may be a little higher than you would like, but they have all been unassisted births. I think a better measure of calving ease would be a stop watch rather than a scale! The ease with which the cow calves is more important to me than the weight of the calf. It is natural for big strong cows to have a little more birth weight.

We are pleased to be once again working with Bohrson Marketing and T Bar C. They're all great people to work with. Thanks also to Lazy Creek for bringing an excellent group of bulls. They really help to round out the offering. Thanks as well to our help: Neels, Gerrit, Allan and Ben.

This year we welcome another new grandson to our family. Jack Francis McCarthy was named after Grandpa John and Grandma Frances, and was born to Simina and Sean in Calgary on January 3. Simina is taking some time off from her law firm, and Sean continues to work as a financial analyst for Enmax. Dan owns and operates IJack Technologies and Olga is a very busy photographer. They are mom and dad to Vivian and John. Lauren is a social media specialist at Trinidad Drilling's corporate office in Calgary and Charlie has re-signed with the Stampeders and works for Johnston's Grain Marketing in the off-season. Grandma turned 97 in December and still gets excited about the sales.

Thank you to everyone who has supported us through the years. We know that we wouldn't be where we are without your encouragement and support. Good things take time, and we are very grateful for all the good things that have come our way.

We are, as always – In Pursuit of Perfection!

## Health Care:

All bulls have been on a full Pfizer health protocol. Bulls were treated with Ivermectin in Oct/15 and Jan/16.

## Sight Unseen Purchase Program

Selecting and purchasing a bull is a very important and sometimes difficult undertaking. We would like to help you select a bull for your program. We have been working with these cattle for many years and consequently know the cow families very well. This knowledge can be very valuable when selecting a bull to accomplish the previously identified breeding goals in your program. Please give us a call well before the sale to discuss your requirements. "We guarantee full satisfaction upon delivery or you don't own them".

## Semen

We reserve the right to draw semen on any of the sale bulls for 'in herd use' at the buyer's convenience and our cost.

## Settlement, Delivery and After-Sale Options:

**Option A:** Purchasers wishing to pick up their bull on sale day will receive a \$50.00 discount per individual purchased. Settlement will be made in full unless other arrangements have been made.

**Option B:** Purchasers may choose to leave their bull(s) on our ranches. Delivery is free to all points in Manitoba, Saskatchewan, Alberta, and to the North Dakota/Canadian border. Arrangements can be made to all other destinations. All bulls are guaranteed exportable to the USA.

**LiveAuctions.TV**

To register and follow the auction in real time on the internet, log on to <http://www.liveauctions.tv>.

For more information, call **Shari Leachman: (306) 903-7289**

The Spring Creek program is one of the highly-respected herds in North America and we would like to welcome you to their annual bull sale. In Pursuit of Perfection is royally named as that is exactly what Brian McCarthy strives for in his progressive breeding program. Spring Creek spares no expense in sourcing and acquiring leading genetics to continually pursue the ideal livestock for today's industry and into the future.

This consistent and powerful set of bulls is backed by one of the very best set of cows in the country. We always promote cow families and emphasize the importance of them, Spring Creek's program has many of the best within the breed. The cow herd is one of the strongest uddered, soundest footed, highest producing sets of females you can find ... the type you want your future herd bulls to be out of. When you mate them with many of the most sought after herd sires in the industry, the results are impressive.

The 2017 offering is deep in quality with a strong offering of power bulls combined with many that will add calving ease. The Lot 1 bull from 56U is one of the exciting sires to sell in 2017 and has a never miss dam behind him. The Simmental bulls are impressive throughout and when you compliment them with a deep set of Angus bulls, this is a sale that appeals to the most critical cattleman. The Lazy Creek program once again is bringing some high performing individuals that are backed by the same strong cows as represented from Spring Creek.

You can count on performance oriented sires backed by strong maternal genetics to run deep in quality once again this year. Brian stands behind these cattle and customer service is very important to them. We hope you can attend the sale but if you can't make it, feel free to utilize our integrity-driven order buying services. We look forward to visiting with you at the farm for In Pursuit of Perfection!

The Springcreek program has always progressed forward as the market place demands change. The McCarthy family has strived to produce a product that leads the charge for beef producers, with profitability the top priority.

The strength of any program starts with the basics from the cow herd up. The Springcreek program focuses on feet, udders and disposition. This has been bred and selected into their program for multi generations, eliminating any guess work from your new bull purchase.

This year's offering is again packed full of meat and potatoes type of cattle and is the strongest offering from front to back, to date. The Simmental division is led by the lot 1 powerhouse that is sired by the highly sought after 56U. This genetic gem will not only add performance but will offer loads of maternal strength and should not be overlooked. These Simmental bulls are a very consistent group, with something for everyone, backed from a cow herd decades in the making. The Angus offering is the largest and strongest to date and will offer purebred breeders and commercial men alike the chance at some very elite Angus herd sires that can rival anything in the country. This group offers many big time breeder bulls and will be worth the drive, as they demand the most astute cattleman's attention. The McCarthy family has developed a very elite herd of Angus cows with the same traits and fundamentals as the Simmental herd in mind.

As you study the sale book, you will find selections that will cover your every need. The offering will again allow you to do all your bull shopping from one operation, from one cowherd and simplify the process.

Along with the large offering of bulls goes the industry leading customer care program. This is a one of a kind insurance program offered when you purchase your bull needs here. As well, there is a volume incentive program with up to 12% discount allowing you to select many 1/2 and 3/4 brothers for a more uniform calf crop. The repeat customer discount is offered to those past customers showing appreciation for your loyalty from past years.

Customer service and satisfaction have and always will be key, alongside providing a high quality product that performs and lasts, making your own operations success and profitability for many years.

The "Pursuit of Perfection" has always offered cattlemen a true grassroots no non-sense progressive approach providing seedstock genetics that add value to any program. It will, as always, be one of the highlights of the bull sale season. Study the sale book and incentive programs and plan to be with us sale day. The T Bar C team is here to assist with any appraisals or absentee buying requirements you may have, as we have been in the bull pens and know the operation. We would love to be a part of your own "Pursuit of Perfection."

# In Pursuit of Perfection Customer Care Programs

## IPOP Bull Sale “Live Long Bull Warranty”

The goal of this program is again to work with our customers in sharing the risk on bulls that will not work based on factors out of their control. We also want to take more responsibility in seeing a bull through to maturity and ensuring things like feet and legs stand up. A bull purchase is a major investment not just for the future of your herd but in the expectation of a longer productive life of the animal. We also assume there is risk past year one, even though most bulls are only insured in their first year of service. We want to work with our customers through to maturity. The time your bull spends in the Winter Feeding Program will be included in this warranty. If the IPOP Bull Sale “Live Long Bull Warranty” is initiated, it will be paid out in the form of a credit towards the purchase of a bull in the subsequent year’s sale. Purchaser must notify Spring Creek Simmentals, (306) 435-3590 immediately of any problems with or death of a purchased bull(s). Purchaser must employ a licensed veterinarian to treat, diagnose and/or fill out a vet form. If the animal dies, a postmortem may be required. Injury or death due to malicious, wilful or intentional acts or mistreatment by the purchaser or his employees is a fraudulent claim. In the event of mortality of a purchase bull, the seller’s credit responsibility will be limited to \$20,000.00/bull or the purchase price if less. Buyers are responsible for their own mortality insurance on individual purchase prices over \$20,000.00. Our goal is to ensure customer satisfaction and to help protect your investment through to maturity. We are your partner in business!

### Breeding Season One

Bull fails/dies -Buyer receives full credit less salvage price if any

### Breeding Season Two

Bull fails/dies - Buyer receives 50% credit on purchase price less salvage value if any

### Breeding Season Three

Bull fails/dies - Buyer receives 25% credit on purchase price less salvage value if any

### Breeding Season Four

Bull fails/dies in fourth or subsequent years - No warranty available

## IPOP Volume Incentive “Go big and go home happy” Program

This simple program is designed to support our customers who need to make multiple bull purchases in one season. Our same customer may not be interested in travelling hundreds of miles to get it done. Discounts will only apply to bulls that are paid for in full on sale day. Absentee buyers will have a 30 day extension for their discount. Partnership bulls will not apply. We want to facilitate and reward your efforts!

### Purchases

2 Bulls – 3% Volume Discount	5 Bulls – 10% Volume Discount
3 Bulls – 5% Volume Discount	6 Bulls or more – 12%
4 Bulls – 8% Volume Discount	

## “New” - IPOP Repeat Customer – Loyalty Incentive Program

2% Discount on all bulls if you are a repeat customer. This will be added on top of your “Volume Discount” if you purchase multiple bulls.

*Once again we welcome you to the “In Pursuit of Perfection” sale. We are very honoured to be apart of such a prestigious sale, and have brought our very best for your appraisal. This year we again have brought our top Simmentals along with a solid pen of Red Angus. We would like to thank all the previous buyers and bidders as well as everyone that has showed interest in our sales through the years. We continue to wake up everyday and have the ability to do what we love, and we thank you dearly this privilege. We would also like to thank Brian and his family for all the hospitality, and guidance they have provided us through the years. It is quite an honour working with such a legend in the industry. Also a shout out to the management who work tireless hours finding homes for the bulls, this integrity doesn’t go unnoticed and we thank you.*

*Our farm is situated 15 minutes west of Moose Jaw, and consists of 140 mature cows (60 Red Angus, 80 Simmentals). We are a family farm, and everyone has their own special roles to make it work. Our cowherd is fed a completely forage diet, and has never received grain as a supplement. Our cowherd is raised with the vision of having the best feet, udder, and natural fleshing ability in mind. We are able to accomplish this feat by culling very hard, and using the best sires we can find. Along with this, we retain a very prolific herd. The cattle are AI’d and/or exposed for 60 days and anything that is open is shipped in the fall. As I write this we have just finished our first cycle and we are three quarters done!*

*The bulls in the offering are stacked with maternal and paternal pedigrees. They are stout made, big topped, sound structured, and will go on to serve the beef industry to their utmost. The dams are all strong uddermed, as we get rid of any problem ones.*

*Please feel free to call anytime (306 631 8749 Jon) or (306 631 8763 Michael) if you have any additional information or to discuss your options. The bulls this year again are being wintered at Brians, and I’m sure he can handle any questions you might have as well.*

*Thank you,  
The Verstegen Family.*

Dam's udder at a younger age

'Liner 9D' has a world of breeding potential. His dam is a beautiful deep bodied cow that would make my all-time 'top 10 list'. Paternal sisters to 9D are in demand as much as any sire group in our Simmental industry. These '56U' daughters consistently raise my top bulls. His sire and dam are both still going strong, and looking good doing it at an advanced age. His EPD's and his individual performance are outstanding along with his very impressive phenotype. He has good testicles and has a very nice disposition. His gestation was 283 days. You will go a long way to find a better pedigreed red blaze faced bull. He is tested homozygous polled. **Retaining 100 doses for in herd use.**

When we bred 'Olympian' we were looking at his maternal strengths and his ability to produce highly sought after and valued bulls. '36D' is an outcrossed herdsire prospect, coming from one of our best black cow families. His maternal grand dam is a top donor here at the farm, and produces the best udders in our opinion. If you are looking for a bull that will produce heavy steers and still produce those females that are very sought after this is the bull for you.

	6.5	3.5	69.5	96.1	8.3	56.7	22.1	90	834	1458

Another really good 'Olympian' son. Deep made and super correct. A lot of maternal strength in this bull as he goes back to the great 'X-T Destiny 73K' cow that has been a staple in our herd as well as in the great 3D Simmentals herd. '61D' has a 'Limited Black' maternal sib that is tops in the second calver pen. We were so happy with how '61D' turned out we bred his dam back, and by the looks of things it to will be a sale feature next year.

Here is a darker red bull out of a productive '56U' daughter that is now owned by Sunny Valley. She also had a popular son that sold to Come As U R and Randy Geisler. He is thick butted and big nuted. He will be a non-dilutor and is Fleckvieh influenced.

This is a true sale feature. We acquired '59D' via embryos from Brians female sale a few years back. He has the genetic potential to be a great one, and has the look to boot. On pasture he turned heads, and never looked back as he weaned at 936 on September 1. His dam is a beautiful specimen selling in Spring Creek's female sale in December to the great 'Sunny Valley' crew. '59D' will be a very dynamic bull that will produce strong bulls and powerful heifers. Retaining 100 doses for in herd use.

This feature bull is sired by another feature bull that sold to Randy Geisler. He is a long bodied bull yet maintains tremendous thickness. He combines a low birthweight and an outstanding weaning weight. His gestation was 286 days. The dam who sold to Little Rainbow has raised bulls for John Wilson, Gordon Jones/Westwood and Shannon Pirlot.

This is without a doubt a future herdsire. When this guy was a calf he had the look and continued to grow exceptionally well. He was a pasture favourite to everyone that visited and demonstrated a great presence all year. In fact he had an actual weaning weight of 996 on September 1. He has a very good disposition and carries good sized testicles. A homozygous polled bull that comes in that dark red colour everyone will be infatuated with. His dam has been a huge producer for us, and has produced both bulls and heifers that work great. She raised one of the high selling heifers in the 2015 Simmsational Sale, going to R Plus Simmentals. Make sure to check this guy out sale day, as he won't be hard to find in the pen. Retaining 100 doses for in herd use.

Another strong 'Royal Red' bull that will turn some heads sale day. '12D' has a lot of the same look that his maternal sibling did last year who sold to Grant Bradley. This guy has mountains of depth and is as stout as they come. The exceptionally warm winter we had last year probably attributed to his birth weight, but I can assure you he flew out when he was born. His dam is a quiet cow, which is an attribute '12D' expresses, and carries a tidy udder that milks a ton.

	0.1	50	87	22	47	10	8	74	755	1420

His 'Upshot' two year old dam is on her way to becoming a top cow. His numbers are good from calving right through yearling. Once again he came early at 269 days and 74 lbs. These short gestations make everything easier.

His dam is the Angus cow that is most often asked about. She has always been easy to look at and be around. Sons have sold to Hebert Livestock Ventures and Jaenen Farms. His pedigree includes some great ones: 'Upward', 'Tiger' and 'Final Answer'. He had a gestation of 273 days and is a red-carrier.

We are very excited to offer this future herdsire, as he has been a standout on the farm since day one. '1D' possesses a great presence about him and has always had that herdbull look. His sire 'Eye Spy' needs no introduction as he has produced many high selling calves throughout Canada and the US. '1D's' dam is well perceived around the farm, and we have a maternal sister to him that looks awesome.

Another great 'Eye Spy' calf out of a sweet 'Detour' cow. Note that a lot of the bulls are 3/4 sibs, and very uniform. This guy will produce very good females with tidy udders.

The '6Z' calves are absolute plugs, and this guy is no different. We have our first '6Z' females in production, and boy are they looking good. Nice square udders with perfect teat size and placement. This bull has always been admired for his explosive style and nice hair. Be sure to check him out sale day.

A very eye appealing 'Eye Spy' bull out of one of the top producing first calvers we have. In fact '28B's' maternal sib is one of our top cows that had a feature bull in last years sale that went to Quebec. Another female producing specialist that will also produce soggy bulls.

When the dam of '16D' comes to mind, all I can think is bull producer. This will be her third straight bull in the sale, and she sure doesn't disappoint. '16D' is an absolute plug that still gives you the calving ease to sleep easy through the night when calving. He will be a great addition to any herd.

An absolute stunner in the pen, this guy has a great set of numbers. '31D' is top 20% for calving ease and top 10% for milking. If there was a definition for a model cow there would be a picture of his dam, '7Z', in that spot. The grand dam '47T' has Elite Dam status, and not by fluke. This bull has a lot of genetic potential, and should be easy to pick out of the pen on sale day, and out of the pasture during breeding season.
