

TRIPLE A ANGUS

BULL SALE

SATURDAY, APRIL 1, 2017 • 1 PM
JOHNSTONE AUCTION MART - MOOSE JAW, SASKATCHEWAN

FROM THE DESK AT T BAR...

On behalf of the Triple A Angus Breeders, this is your welcome and special invitation to join us for the 20th Anniversary of the Triple A Bull Sale at Johnstone Auction Mart, Moose Jaw, Saskatchewan.

This long running event features a powerful set of yearling Angus bulls, both red and black, that have been performance tested since the middle of October and come with a complete set of performance records enhancing this powerful group of bulls. The bulls have been on test at Hagerty Livestock and can be viewed there. They are located 6.5 miles north of highway #1 on Kalium road near Belle Plain or the bulls will be available for viewing at the sale barn the day prior the sale.

The offering is comprised of a top set of bulls... diverse in both phenotype and genotype. They will suit virtually any program and any budget. If you are looking for low birth sires (calving ease) for the heifer pasture or power bulls for the cows, there is a great line-up to select from. The group represented are long standing breeders, with proven highly maternal cowherds, using the latest genetics. Feel free to contact any of these progressive Saskatchewan breeders as they will be pleased to answer any questions or help you with your breeding requirements.

Come early, view the bulls and be guests for a complimentary noon luncheon.... it will be worth the trip! If we may be of assistance prior to or sale day feel free to call any of the T Bar Team or myself, we are willing to assist you in a professional, confidential manner.

CHRIS POLEY

	-0.4	53	78	17	44	n/a	3.4	4.0	10

ULTRASOUND CARCASS DATA:

The importance of carcass trait information will be increased as value based marketing and quality assurance programs become more recognized and commonplace in the beef industry. Cattle should be scanned as close as possible in age at which their progeny will likely go to slaughter. A range from 12 months to 14 months is probably optimal. Ultra Sound Measurements in a Breed Program: As with all genetic traits, ultrasound measurements should only be compared among animals of similar age and similar management. Only then is it of any measured value to use the ultrasound measurement for selection.

BACK FAT

Fat measurement is important for several reasons. First fat depth influences lean meat yields; fat bulls have less lean meat in the carcass. Secondly fat measurements give indications of a bull's fleshing ability. Extremes in either too lean or too fat a bull are undesirable. Moderation is key.

IMF/MARBLING

This may be the most important attribute to be measured with ultrasound. This trait can convert into as much as \$80 difference in a carcass from a AA to AAA grade. The values are numerical and indicate the estimate of carcass marbling if the animal was slaughtered immediately following the evaluation. The scale is as follows:

IMF%	US	CAN	MARBLING SCORE
2.3 – 3.0	Select -	AA -	4.0 – 4.4
3.1 – 3.9	Select +	AA +	4.5 – 4.9
4.0 – 5.7	Choice -	AAA -	5.0 – 5.9
5.8 – 7.6	Choice o	AAA o	6.0 – 6.9
7.7 – 9.7	Choice +	AAA +	7.0 – 7.9
9.8 – 12.1	Prime -	Prime -	8.0 – 8.9
12.2 +	Prime +	Prime o	9.0 +

Bulls will register at least a full degree less marbling and 30% less back fat thickness than steers of the same age and feeding history. The marbling estimates are best utilized by grouping the bulls into high, medium and low marbling groups rather than to compare individuals that differ by only a few tenths of a score.

RIBEYE AREA ADJUSTED TO 100 LBS BODY WEIGHT (REA IN/100 LBS)

The largest ribeye area may belong to the largest bull therefore adjusting the REA to 100 pounds body weight helps determine which bulls are more muscular and which bulls are simply heavier.

LEAN MEAT YIELD (LMY%)

This is the percentage of lean meat in a carcass. Yield grade is an economically important factor in marketing carcasses. With a high genetic potential, this trait can be an important objective in a breeding program.

We are very pleased with all of our Big Dawg calves and they have been popular consignments in other breeder's herds as well. Big Dawg semen is in very limited supply so don't miss the chance to buy a direct son. That being said, we are pleased to offer three Big Dawg sons for this year's AAA sale. Lot 1 is a meat machine. Out of one of our top Duchess females, this bull is thick muscled, deep barreled, structurally sound and will go out into any herd and produce the weights you need. A ½ brother sold to Reese Klindt at the 2016 AAA sale.

Our third Big Dawg son on offer here at the AAA sale; following in his brothers footsteps, what's not to like about this bull. The muscle expression in this bull is exceptional, he moves smoothly and freely, and comes from a long line of bull producing cows at the Valley Lodge herd. A ½ brother sold to Ken Harle at the 2016 AAA sale.

This was our first calf crop out of KG Solution 0018 and some of the first Solution calves registered in Canada. We were attracted to the outcross calving ease, maternal pedigree, plus great performance. If you think this bull looks impressive on paper you should see him in the pen. This bull has muscle, length, strong feet and legs. This bull has it all and will definitely be one to watch for at the sale. A nice long bodied bull that will work very well on heifers.

Here is a phenotypically perfect bull who is a black/red carrier. He was a pasture pleaser all summer and could be picked out from a mile away. His EPD's are very high with great performance. His dam is an ideal looking brood cow that we are quite confident in.

All we can say is we love our Detour calves! This sire was purchased from Spring Creek and he adds so much bone, depth and length to his calves, along with spreading out those hooks and pins will make you want to seriously take a look. This bull is thick with plenty of muscle shape. He is a heifer bull that will not sacrifice pounds on the calves in the fall.

Lots 51-54
 Our senior herd sire, Willowview Big Split 19A was acquired in dam from a bred heifer we purchased. Once we saw his potential we decided to keep him for our own herd use. First and foremost he consistently sires low to moderate birth weight calves. Along with this he has excellent feet and bone structure, well muscled and a great temperament. The dams are top notch mothers from proven sires, always delivering top end calves.

Radiance 13D is our first son out of our herd sire Triple H Intuition 14B. We took 14B to the Heart of the South Angus Tour and Pen show at the Howe Family farm in 2016, where he placed 2nd in the show. Radiance has a low BW made for calving ease with the ability to pack a punch as he gained 4.3 lbs per day based on the Jan. 31st weights. Lots of Great Genetics in this Bull, Brilliance, Hoover Dam, Bismark, Pioneer and Special Focus. But most important he looks the part and will work well in your Heifer pen.

A balanced combination of maternal traits and power. 21D's Dam is one of our most consistent cows. His full sister sold in the Keystone Classic this fall as a bred and a half sister is the Dam of lot 66. If you want calves that will push the scale down and females that will produce for years to come, 21D is a great candidate.

A great choice for the heifer pen. This "sleep easy" heifer bull has a lot of style to go with his 79 pound birth weight and -2.9 birth weight EPD (top 10% of the breed).

You be the judge on this guy, he's wide topped, deep bodied with a dark red hair coat. His sire Red Triple H Warlock 33B goes back to T-K Governor (Warden 144W x Mulberry) and his dam HRA 35B did an outstanding job on her first try. With only an 80lb birth weight and yet a 205 wt of 768 this fella has some performance. Could be used on Heifers.

HRA 1D is out of the Genex sire Red C Bar Anticipation 101W and his dam is a T-K Governor daughter. These Governor females have been very popular, daughters are out working for Wraz Red Angus, Howe Red Angus, Emmatt Creek, Sentes Farms, Blake's Red Angus, Broken T Ranch and Leon Roy. We also have many of them working in our herd as well. If you are looking to add to the maternal and performance traits in your herd, this deep sided bull would be a great choice. EPD'S: 5 traits in the top 10% of the breed.

This is the first bull sired by our new herdsire Red Pasquia Hustle 12B (Alvin's high seller in 2015). We are very impressed with his calves, they are long bodied, dark red, good hipped with fantastic hair coats. 14D's dam traces back to Mulberry and New Trend, so if you want to add milk to your herd this bull will get the job done. HRA 14 D is long spined, dark red with a great hair coat. You will not want to part with his heifers.

Here's an interesting genetic combination: Fully Loaded, Arab 159 and Milk Creek Cub 722 all packed into one tank of a bull. With a 79 pound birth weight and a -2.2 Epd, this stout, wide topped and hairy rascal could be used on heifers. He has been one of my favorites on pasture and I know he will add pounds and hair to your next calf crop. Our top gaining Red Angus bull.

TERMS & CONDITIONS

TERMS...

The terms of the sale are cash or cheque, payable at par at the sale location. The right of property shall not pass until after settlement has been made; no invoicing on buyers in attendance unless previous arrangements have been made. Every animal sells to the highest bidder and in cases of disputes, the auctioneer's decision will be final.

Announcements made from the auction block will take precedence over the printed matter in the catalogue. Current exchange rates will be announced sale day. All monies are in Canadian funds.

CERTIFICATE OF REGISTRATION...

Each animal will carry papers issued by the Canadian Angus Association. A certificate of registry duly transferred will be furnished to the buyer for each animal after payment has been made.

HEALTH...

All animals in the sale have met all necessary health requirements.

GUARANTEE...

Each animal becomes the purchaser's risk immediately after the animal is sold. All animals in this sale will be sold under the terms and guarantees set forth by the Canadian Angus Association with regard to health, freedom from defects and from both reproductive and specific genetic unsoundness.

LIABILITIES...

All persons attend the sale at their own risk. The seller, facility owner and sale manager assume no liability, legal or otherwise, for any accidents that occur. It is understood that T Bar C Cattle Co. Ltd. is acting only as a medium between buyer and seller and is not responsible for any obligations to collect or enforce collection of any monies between parties and any legal action that may, in extreme cases, be taken must be between buyer and seller. T Bar C Cattle Co. Ltd. assumes no responsibility of any credit extended by the seller to the buyer. The buyer must look to the seller for fulfillment of all guarantees and representations made hereunder.

PHONE, MAIL & WIRE BIDS...

Bidders unable to attend the sale may phone, wire or mail their bids and instructions to the sale manager, auctioneer or special representatives. Bids must be received in sufficient time prior to the sale.

INSURANCE...

We strongly recommend that insurance is purchased for full value.

ERRORS...

All announcements at sale time, written or oral, supersede any written material in the catalogue.

DELIVERY...

Delivery can be arranged at a cost of \$100 per bull within 300 km of Moose Jaw. If you are over 300 km we can assist you in making travel arrangements at cost.

NOTES...

Return Undeliverable
Canadian Addresses To:
T Bar C Cattle Co. Ltd.
