*2-Year-Old* BULL SALE  
**1 FEB 17**  
KISBEY, SASKATCHEWAN, CANADA

*Moose Creek*

— R E D   A N G U S —

# *welcome to* **MOOSE CREEK RED ANGUS** *2-Year-Old Bull Sale*

Welcome to the 2017 edition of the Moose Creek 2-Year-Old Bull Sale. It is a pleasure to offer to you our finest sale group ever.

Last year's sale proved to us that we were headed in the same direction as our loyal customers. The results were more than we could have imagined; aggressive bidding from B.C. to Ontario with many highly-respected commercial cow-calf herds purchasing herd bulls. Our goal has always been to sell to innovative, grassroots operations and last year we were rewarded with only 2 bulls out of 115 sold going into registered herds.

As the market works to find its level, results in the sale barns continued to point out top calves – heavy, hairy, big bodied steers and heifers still required a premium to purchase with many of these groups netting >15% more than their average weight break. Quality demands a premium and rarely requires more work. The financial advantages to quality stock are well documented.

This group is our largest and most complete yet. They really are developing into the offering that we have strived to produce: bulls that are extremely sound, hairy, big bodied and fed responsibly to ensure they last. We have worked to select the kind of genetics – regardless of breed – that can make it in a management system that prides the hard working and punishes the hard doing. The data we have supplied is actual, relevant numbers that can help you make important breeding decisions.

This sale offering has been bred, born, raised and developed on our ranch. We are a family-run operation and value cattle that fit into our grass-based system. These bulls are not left overs – they weren't too small to sell as yearlings, they were bred and developed specifically for this sale. The 2018 offering is already sorted and being managed for it.

What truly separates our outfit from our competitors is the importance of customer service. It is our main priority to get your cows or heifers settled to a quality herd bull. All we are trying to do is treat our customers the way we would like to be treated in the same situation.

We would love to host you Wednesday, February 1, here at the ranch in our heated sale facility. Jack and Dianne Wilson will be serving lunch from 12:00-1:00 p.m. and that alone is worth the trip.

## **DARREN IPPOLITO** *for* **MOOSE CREEK RED ANGUS**

**CONDITIONS & GUARANTEES:** All entries sell with a responsible breeder's guarantee of satisfaction. In the unlikely event of any dispute whatsoever, regular terms & conditions shall apply in accordance with the Canadian Angus Association Code of Ethics.

**ALL CATTLE ARE SOLD** subject to tests as required for export under Regulations of the Health of Animals Branch, Department of Agriculture for Canada. Export health chart and brokerage charges are the responsibility of the purchaser.

**TERMS OF PAYMENT:** Cash or cheque payable to the clerk of sale on sale day. U.S. Funds will be accepted at the current Rate of Exchange on sale day.

**INSURANCE:** Ownership risk to purchaser commences when auctioneer's hammer falls. Full mortality insurance is available sale day. Cattle returning to Moose Creek Red Angus after the sale must be insured.

**HOLDING & SHIPPING:** Approximately one week is required for export transfers and other documents to be processed. Export animals will be held at the Sale location at no charge and under excellent care. Joint export shipping arrangements to obtain minimal shipping cost will gladly be made if instructions to that effect are provided to Clerk of Sale at time of settlements.

**TRUCKING:** Free delivery will be available for any bulls selling for \$3,500 or more. Bulls selling for less will be delivered at cost, except if multiple lots are purchased, delivery is free. Delivery will begin mid April, anyone requiring their bull for May turnout will have them delivered in April. Most deliveries will be to your yard, however some may be to central locations due to size and time. If the truck is headed past your yard, expect your bull to be on

it. Anyone taking advantage of the delivery option must insure their bull, no exceptions.

**HAUL YOUR OWN:** Bring your trailer sale day and receive a \$100 discount per bull.

**OWNERS:** Reserve the right to withhold from export shipment animals for whom Buyer or Buyer's agent have not made arrangements for payment in full, or other satisfactory arrangements, prior to time of export departure.

**ALL PERSONS** who attend the sale do so at their own risk, and the owners and sale staff assume no liability, legal or otherwise, for property loss or for any accidents that may occur.

**VOLUME PURCHASES** Any buyer purchasing three or more bulls of any breed will receive 5% off of the purchase price total. This can be used with the "haul your own" discount.

## **ONLINE BIDDING**

Watch and bid online at [DLMS.CA](http://DLMS.CA): Mark Shologan, 780-699-5082. Please register to bid before sale day.

If you're planning to bid online, please feel free to contact sale staff or Darren as we are pleased to help select a bull(s) that will fit into your program. It is our utmost priority to ensure you secure the correct bull for the system and role you plan to use him in.

# MOOSE CREEK RED ANGUS 2-YEAR-OLD BULL SALE

1:30PM • WEDNESDAY, FEBRUARY 1, 2017

AT MOOSE CREEK RED ANGUS  
3 MILES SOUTH & 1 MILE EAST  
of KISBEY, SASKATCHEWAN

RED ANGUS • RED SIMMANGUS • CHAROLAIS

## PHOTOS AND VIDEOS

Additional photos and videos of the offering will be on the website at [www.moosecreekredangus.com](http://www.moosecreekredangus.com).

## CATALOGUE ORDER IS SALE ORDER

## DEVELOPMENT & DELIVERY

We will continue to develop your newly purchased herd sire(s) for you at no cost. All we ask is that you insure your purchase for the duration that he is being developed. The bulls staying until spring will be semen checked and delivered to you in April/May or as loads develop for your area. For anyone wanting to develop their own bulls, a rebate of \$250 per bull will be subtracted from the purchase price. This applies to any bulls taken sale day or delivered within seven days of the sale.

## SEMEN TESTING

All of the bulls in the sale have been vet inspected, palpated and scrotal measured prior to going to grass in the spring and again prior to the sale. None of the bulls selling have been semen checked. Most veterinarians agree that semen checking is only valid for up to 30 days post testing. Any of the bulls selling are fully guaranteed; if they happen to be incapable of settling cows, a replacement bull will be supplied until a suitable bull is available. Credit for the incapable bull may be used at any Moose Creek sale on any breed of bull. At no point shall the compensation be greater than the purchase price.

# GLOSSARY

## DETAILING TERMS USED IN THE CATALOGUE

The data we supply in the catalogue is actual, relevant numbers to help you make important selection and breeding decisions. These numbers include actual performance data taken at the stages of development that are critical to commercial operations: birth, weaning, one year, and coming off of summer pasture. Current weights and average daily gain offer additional comparison tools.

<b>ACTUAL BIRTH WEIGHT</b> The bull's weight in pounds, taken at birth.									
<b>ACTUAL WEANING WEIGHT</b> The bull's weight in pounds, taken at weaning.									
<b>ACTUAL YEARLING WEIGHT</b> The bull's weight in pounds, taken at one year old.									
<b>OFF-GRASS WEIGHT</b> The bull's weight in pounds, taken off of pasture on Nov. 15, 2016.									
<b>CURRENT WEIGHT</b> The bull's weight in pounds, taken at cataloguing time.									
<b>AVERAGE DAILY GAIN</b> The bull's gain from Nov. 15 - Jan. 2 in pounds/day.									
<b>SCROTAL CIRCUMFERENCE</b> Available sale day.									
PERF	ACT. BW	ACT. WW	ACT. YW	O.G.WT	CURRENT	SC	ADG		
EPDs	CE	BW	WW	YW	MILK	TM	MCE	SALE DAY WEIGHT	

### CE CALVING EASE

The average difference in ease with which a sire's calves will be born when he is bred to first calf heifers. The higher the number the more probability that his calves will be born unassisted

### BW BIRTH WEIGHT

Expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

### WW WEANING WEIGHT

Expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires. Weaning weight is an indicator of growth from birth to weaning (205 days of age). The calf's growth during this period is influenced by its own ability to grow plus its mother's maternal abilities. The higher the EPD, the heavier, on average, the calves of a sire will be at weaning.

### YW YEARLING WEIGHT

Expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires. The higher the EPD, the heavier, on average, the calves of a sire will be at yearling.

### MILK MILK

Is an indicator of milking ability in daughters. It represents the differences in weaning weights of calves due to the amount of milk produced by their mothers. It is expressed in pounds of calf weaned. The higher the EPD, the more weaning pounds a sire's daughters will add to her calves via milk.

### TM TOTAL MATERNAL

Is a combination of the weaning weight and milk EPDs. It is calculated as:  
 $\frac{1}{2} \text{ Weaning Weight EPD} + \text{Milk EPD} = \text{Total Maternal}$ . This EPD represents the differences in weaning weights between calves due to mothering and milking ability of their dams.

### MCE MATERNAL CALVING EASE

Is expressed as a difference in percentage of unassisted births with a higher value indicating greater probability of unassisted births in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires

# REFERENCESIRES

## RED WRAZ HITCH 52A

BW -0.7 | WW 58 | YW 88 | MILK 17 | TM 48 | CE 2.1 | MCE 5.8

Very versatile herd bull with calving ease, attractive look, and moderate calves. Ideal for minimum management systems.

## RED LINES PINE CHIEF 15Z

BW 0.5 | WW 60 | YW 88 | MILK 17 | TM 48 | CE 2.7 | MCE 0.9

Old time genetics meet 21st century growth. His sons and daughters continue to be noticed first by visitors.

## RED HOWE DESIGNER 63X

BW 1.0 | WW 52 | YW 96 | MILK 21 | TM 46 | CE 0.9 | MCE 1.9

Our leading herd sire for performance and maternal. A true breeding giant, leaving progeny better than himself.

## RED SVR GANGSTER 44X

BW -3.4 | WW 50 | YW 70 | MILK 15 | TM 39 | CE 6.2 | MCE 8.1

Gangster does it all here. If he could drive the tractor and open the gates he would be the perfect bull.

A Red Angus cow stands in a field of tall, dry grass. In the background, there is a dense forest of bare, light-colored trees, possibly birches, with thin trunks and no leaves. The scene is lit with warm, golden light, suggesting late afternoon or early morning. A semi-transparent text box is overlaid on the right side of the image.

## *Red Angus*

Our Red Angus program is one of the oldest and most respected in Canada. We have lead by example, breeding and selecting a sound, fertile, efficient cowherd mated to top-notch herd sires. We've wasted no resources selecting genetics that will thrive in low-management systems, where extended feeding and grazing strategies are utilized. Most importantly, we place our nearly six decades of Red Angus breeding reputation on the line every time we offer a herd sire for sale.

## ABOUT THE NON-VIRGIN BULLS IN THE SALE

Some bulls in the sale serviced females in 2016. Any that did will be marked with an "★". All bulls that saw service in 2016 will have been Trich tested prior to the sale and sold as Trich free. A full description of each bull's group they serviced is available and/or will be noted in their footnotes.

# THANK YOU

## TO OUR CUSTOMERS & FRIENDS

A heartfelt thank you to our customers for supporting us for over 40 years in the business. Many have been with us for more than 25 years while spanning 3 different generations of bull buyers. It is an honour to call so many of you friends!

# *Red SimmAngus*

The growth of our Red SimmAngus offering is a product of demand and luck. The base of our Red SimmAngus program is from two elite Red Angus herds we were fortunate to purchase. To develop superior Red SimmAngus stock, we knew we needed to start with an elite base. The foundation for our Red SimmAngus offering is as strong as any in the nation. They have been the reason for our success marketing nearly 250 home raised, F1 bred females the last couple years. Their breeding strength is undeniable.

# REFERENCE

# RENDEZVOUS 125Y

BW 5.7 | WW 76 | YW 101 | MILK 22 | CE 6

This red blaze face herd sire anchors our Simmental bull battery. He is super sound, tremendous footed with an unbelievable disposition. His sons have been the first to go each spring when we sold privately and his daughters are equally as impressive. He adds lots of performance without adding additional frame size.

## BLCC MR HOUSTON 30Y

**BW 5.8 | WW 69 | YW 106 | MILK 30 | CE 8**

This hairy fullblood son of the immortal Houston has been another cornerstone bull in our hyBRED program. He is the most maternal sire we run and his milk proof confirms that. Extra stout, very moderate and big barrelled, Houston is an easy bull to look at year round.

# Charolais

For a decade now, we have been developing and breeding Charolais genetics. Our herd has grown from one cow to nearly 70 cows and back to 35 breeding females. The expansion and culling was in order to select the type of Charolais that will flourish in the systems that we and our clientele use. Cattle that are easy calving, vigorous at birth and maternal while still not losing focus on the superior traits that Charolais possess: performance based, stout, hairy, big pay weight stock. We have not worked to down size the white cows, however we have been successful at making them easier fleshing, lower maintenance and harder working.

COMMERCIAL BRED HEIFERS

Selling 20 Red SimmAngus heifers in groups of 2-5.

These heifers are our own ranch females, sisters to the bulls in this catalogue. They have been exposed to our Red Angus yearling bulls (some in the sale), from June 4, 2016, to July 22, 2016, to calve March 10, 2017 to April 30, 2017. They are fully vaccinated, age verified and have had their first Scour shots. Delivery terms are same as bulls; delivery will begin a few days after the sale. If you pick up sale day, \$100/pen will be deducted.

# GENOMICS

## THE NEW PROFIT TOOL FOR THE 21ST CENTURY

“Testing for the leptin gene in livestock is a new cutting edge proposition associated with DNA gene markers. The IGENITY-L™ test, provided by Merial, allows producers to utilize yet another tool in beef production to improve carcass merit.”

“Leptin is a protein produced in white fat tissue and the more leptin produced, the stronger the signal is sent to the brain to reduce appetite,” Tate says. “The leptin protein is directly related to appetite, energy utilization and fat deposition.” (Clifford, 2005)

### RFI (Residual Feed Intake)

“An efficient bull will pass on superior genetics for feed efficiency to his progeny, which will be realized as feed savings for calves in the feedlot and for replacement heifers entering the cowherd.”

### The Effect of Leptin on Average Daily Gain and Feed Efficiency

The particular gene being examined produces leptin, which is associated with appetite. Cattle with the fully mutated form of leptin (genotype TT) put on weight faster than those with the slightly mutated form (genotype CT) which put on weight faster than those with the non mutated form of leptin (genotype CC).

- > Leptin positive animals finished for slaughter approximately 37 days faster and had an ADG of 3.323 compared with non-positive animals that had an ADG of 2.937.
- > Leptin positive animals also exhibit a greater feed efficiency (6.4) compared to non-positive animals (8.2). (Quantum Management Protocol)

### Yield Grade

Although the results vary in terms of the proportion that grade AAA or higher, the trend has always been the same: TT cattle have a much higher chance of AAA, or in the USA system “Choice.”

### Milk Production

Prior research indicates that a SNP at position 305 of exon 2 in the leptin gene affects milk production in

dairy cows. Dairy cows with at least one copy of the T allele have been shown to have higher milk production than CC cows. If that effect carries over to beef breeds, it is reasonable to expect that CT and TT beef cows will wean heavier calves than CC beef cows. We tested this hypothesis for a herd of mixed breed cows using anova. Results indicated that both crossbred CT and TT beef cows wean significantly heavier beef calves than CC crossbred beef cows.

### The Effect of Leptin on Lactating Beef Cows and Calf Weaning Weights

SPRING	CC	CT	TT
Initial cow body weight	1369	1334	1322
FALL	CC	CT	TT
Final cow body weight	1410	1397	1400
Change in body weight	+41	+63	<b>+78</b>
	CC	CT	TT
Calf weaning weight	603	614	634
WPDA (lbs/day)	2.95	2.95	3.02
TT calves wean extra lbs			<b>+31</b>

**LEPTIN** is a hormone that regulates feed intake, energy expenditure and whole-body energy balance. A SNP in the Leptin gene has been associated with several economically important traits including: milk production, weaning weight, backfat, marbling, quality grade, yield grade, dry matter intake, and days on feed.

#### THERE ARE 3 LEPTIN VARIANTS:

**CC** animals have less fat and therefore, are less economically favourable.

**CT** animals are economically intermediate.

**TT** animals have more fat and therefore, are more economically favourable.
