

# **TRIPLE A ANGUS**

---

# **BULL SALE**

**SATURDAY, MARCH 31, 2018 • 1 PM**  
**JOHNSTONE AUCTION MART - MOOSE JAW, SASKATCHEWAN**

# FROM THE DESK AT T BAR...

Welcome to the Triple A Angus Bull Sale on March 31, at Johnstone Auction Market, Moose Jaw, Saskatchewan. 2018 celebrates the twenty-first anniversary of this sire source of black and red Angus. All the bulls are at Hagerty Livestock located 6.5 miles north of the Trans-Canada highway on Kalium Road near Belle Plaine. Feel free to stop by anytime for a preview.

The sale represents a group of progressive breeders who have been supplying bulls to the industry for over two decades. This sale offers diversity both genetically and in phenotype... which gives the buyer a broad selection to choose from. Whether you are looking for an easy calving bull for the heifers or even both pastures or a power bull to throw out with continental cows to add identity and pounds at weaning, there are bulls for all types of tastes and budgets.

Plan to be with us for an opportunity day in Moose Jaw; you will find a fresh, new bull to add value to your program and bottom line. Feel free to call any of the breeders, if you have any questions or to discuss their offering.

If we, at T Bar C, may be of any assistance, prior to or sale day, do not hesitate to give myself or any of our professional team a call, as we can help you with your needs.

**CHRIS POLEY**

# ACQUIRE THE ANGUS ADVANTAGE

## AT THE 21ST TRIPLE 'A' BULL SALE

**83 YEARLING BULLS ON OFFER**  
**70 BLACK ANGUS • 13 RED ANGUS**

Lunch at 12:00 Noon • Sale at 1:00 PM • Saturday, March 31, 2018  
 Johnstone Auction Mart, Moose Jaw, Saskatchewan

### DEFINITIONS

- BW – Birth weight – all weights are measured in pounds.
- SOT – Start of test weight
- EOT – End of test weight
- Proj Wt – Estimate of sale day weight
- 205 – Adjusted weaning weight
- ADG – Average daily gain – gain in pounds per day during the test period
- WPDA – Weight per day of age
- AOD – Age of Dam

BLK	BW	WW	YW	Milk	TM	SC	CED	CEM	
	2.3	45	79	21	43	0.72	3.2	6.9	-
RED	BW	WW	YW	Milk	TM	SC	CED	CEM	Stay
	-0.6	51	78	16	42	n/a	3.6	4.1	10

### ULTRASOUND CARCASS DATA:

The importance of carcass trait information will be increased as value based marketing and quality assurance programs become more recognized and commonplace in the beef industry. Cattle should be scanned as close as possible in age at which their progeny will likely go to slaughter. A range from 12 months to 14 months is probably optimal. Ultra Sound Measurements in a Breed Program: As with all genetic traits, ultrasound measurements should only be compared among animals of similar age and similar management. Only then is it of any measured value to use the ultrasound measurement for selection.

### BACK FAT

Fat measurement is important for several reasons. First fat depth influences lean meat yields; fat bulls have less lean meat in the carcass. Secondly fat measurements give indications of a bull's fleshing ability. Extremes in either too lean or too fat a bull are undesirable. Moderation is key.

### IMF/MARBLING

This may be the most important attribute to be measured with ultrasound. This trait can convert into as much as \$80 difference in a carcass from a AA to AAA grade. The values are numerical and indicate the estimate of carcass marbling if the animal was slaughtered immediately following the evaluation. The scale is as follows:

IMF%	US	CAN	MARBLING SCORE
2.3 – 3.0	Select -	AA -	4.0 – 4.4
3.1 – 3.9	Select +	AA +	4.5 – 4.9
4.0 – 5.7	Choice -	AAA -	5.0 – 5.9
5.8 – 7.6	Choice o	AAA o	6.0 – 6.9
7.7 – 9.7	Choice +	AAA +	7.0 – 7.9
9.8 – 12.1	Prime -	Prime -	8.0 – 8.9
12.2 +	Prime +	Prime o	9.0 +

Bulls will register at least a full degree less marbling and 30% less back fat thickness than steers of the same age and feeding history. The marbling estimates are best utilized by grouping the bulls into high, medium and low marbling groups rather than to compare individuals that differ by only a few tenths of a score.

### RIBEYE AREA ADJUSTED TO 100 LBS BODY WEIGHT (REA IN/100 LBS)

The largest ribeye area may belong to the largest bull therefore adjusting the REA to 100 pounds body weight helps determine which bulls are more muscular and which bulls are simply heavier.

### LEAN MEAT YIELD (LMY%)

This is the percentage of lean meat in a carcass. Yield grade is an economically important factor in marketing carcasses. With a high genetic potential, this trait can be an important objective in a breeding program.

AI sired by SAV Resource 1441 a moderate framed birth weight bull known for siring tremendous consistency in his calves. They display excellent body mass, weight gain and efficient feed conversion. Sound feet and legs along with improved scrotal development in the bull calves and udder development in the females. Resource's EPD's are in the top 3% for WW and the top 1% for YW in the Angus breed.

Lots 4-6

These are the first bull calves for sale sired by J.D. He has an outstanding pedigree, great EPDs and was the 2015 Agribition Reserve Intermediate Bull Calf Champion. He is sired by the \$400,000 bull International. His dam Werner Black Angel 1299 is owned by Bohrsen and Rust, she is one of the breeds most complete donor females in the Angus industry. When we purchased J.D. from Jackson Cattle Company he was the first bull to sell from this pairing. J.D.'s first calves were just what we were looking for. His second set of calves continue to exhibit the same tremendous length of body, depth, easy fleshing, moderate birth weight with an easy going disposition. J.D. is siring calves that will get the job done.

Here is a bull who has as neat of pedigree as you can make. This is the only chance to get progeny of 528 as she unexpectedly passed after Styl'n was born. She was the Grand Champion Heifer at the 2016 Regina Spring Steer and Heifer Show. She was going to be the cow that Kodie was going to base his whole herd around. Styl'n's sire sired the \$127,000 Silveiras Saras Dream 6521 who goes back to the famous Sandy cow family. Styl'n is extremely deep bodied and is extremely sound to the ground. He is nice fronted and will produce top notch replacements that everyone strives for. 528 was a terrific mother and had a tremendous udder.

This Motive son is super stout made and is high performing. His dam is a nicely made Jock daughter with a perfect udder. He will work well in the heifer pen and go on to produce heifers that will be heavy milking top producers. He will add pounds to his calves and they will start off small. Fugitive is deep bodied and heavy muscled and is structurally correct. He reads well too, with being 101 on yearling weight.

Motive needs no introduction to the industry as he is still leading the registrations in Canada. Prestine is a 3/4 brother to lot 9 and is very similar in type. He will also make for sleep easy nights as he had only a 73 lb. birth weight. His dam sold this past fall to Anderson Cattle in Swan River and they were very satisfied with their purchase. She had another strong bull calf this year. He will work well in any herd whether it is purebred or commercial.

This bull does not disappoint us as he has performed very well on test. There are not very many Pure Products around anymore so he has a bit of a different twist on paper. His Jock dam produced this bull that is as deep and soggy has any bull in our offering. Pure Product has produced numerous high sellers over the years because his progeny are meant to fit the bill and produce cattle that will perform in any setting, and we feel Prestigious will be no exception.

This was our first calf crop sired by GQ and we love them! He really works in our program. Whether it's a heifer or a bull calf they are appealing in the pasture and or show ring. GQ Trendy is super deep bodied and has a long spine while not sacrificing any muscle shape. He has a great look about him. His mother who is off Ransoms has an ideal udder like any of our other Ransom daughters. She is super deep bodied and held her condition extremely well for Trendy being her first calf.

Bank Note took the world by storm this past year and 7044E is an example of the reason why. He combines the natural look to produce eye appealing cattle and muscle to pack on the pounds of the steer calves so he is the best of both worlds. His mama Ruby, is a no miss cow that stamps our calves each year and are always at the top of the pen. A few years ago at Showdown and at Agribition Junior Supreme she produced the Reserve Champion Bred Heifer in bred and owned. This Banknote son is super sweet made up through the front end while carrying all the natural muscling while still being super sound.

When we were looking for a new bull a few years ago the South Dakota progeny intrigued us. We purchased this bull's sire from Mohnen Angus. Black Gold is the youngest bull in our offering but he definitely hasn't disappointed us as he carries a good weight per day of age as well as good conformation. His dam 373A is becoming one of our top cows as she produces top calves each year.

This bull is off Crush who is last year's Reserve Champion Bull in Denver. Crush 7010E will make for sleep easy nights as he has a very low birth weight and a smooth shoulder to him. He is off a Detour first calf heifer who is going to be an up-and-coming top cow in our herd. This bulls progeny will crash down the scales well and still coming out at a nice lightweight.

Last year our show bull Power Up made a lot of friends in the barn as he has a perfect foot & leg under him. We are proud to say his feet have NEVER been trimmed! Many people said he was one of the soundest bulls in the barn. 7013E takes after his sire and exhibits many of the same traits as he does. This dark cherry red bull is super smooth and deep made and will be easy to find in the pen. Calving ease with a punch. Anderson Cattle Co and Triple H used him on heifers and have not had to assist them. We have used him on cows. His mom 411 B has a very good udder underneath of her and is going to do good things for our program in the future.

Here's another soggy son of the Champion himself Crush who has been a favorite all summer. His mother who is a consistent moderate sized producing black red carrier cow stamps her calves each year. This bull is deep made and will work for most Cattleman. He really gives a different twist in his pedigree that most people won't have since he goes back to Fullback on the dam's side. If you are looking for a cow bull take a look at this guy.

These Moonshine 453B sons are peas in a pod in terms of muscle expression and phenotype. 25E is more moderate in his structure and could be used selectively on heifers. He is blood red with good testicle development and a quiet disposition.

This bull is sired by (you guessed it) Moonshine 453B. 453B sure did a job for us his first at bat! 27E's dam is a "T" cow that has raised numerous good calves for us over the years and 27E is no exception. He is moderate framed with good spine length and a big hip.

Another Moonshine 453B son. His dam HRA 114X has raised four herd bulls, last year's sold to U6 Livestock. With a 205 WT of 830 lbs., he was our top performing calf. We showed him at this summer's North West Angus Tour in the Lloydminster area. He had a lot of admirers. 20E has a Ribeye of 15.29, second highest in the sale (top Red Angus). This dark red, long bodied and square hipped bull will definitely add pounds to his calves.

A great choice for the heifer pen. This "sleep easy" heifer bull has a lot of style to go with his 79 lb. birth weight. Sired by our main herd sire, Triple H Intuition 14B (Brilliance x Hoover Dam). Last fall Lock Farms showed an Intuition 14B son at Lloydminster Stockade Roundup and Agribition. 19E's dam is a Final Answer daughter that always raises a good one. 19E is smooth made, deep ribbed and long spined, he is a well balanced bull in person and on paper.

We saw the sire of this bull, Northern View Gustov 3Z at Agribition and purchased a semen package. We used a straw on our designated Canadian Angus Premier Dam, DJ 820Z, a Pioneer daughter. 16E is the result of this mating and he has had that herd bull look to him right from the start. This eye catching, thick made bull puts it all together very nicely.

Mohnen South Dakota 402 has worked very well on our cow herd. His EPD's for weaning weight and yearling weight are in the breed's top 2% and 4% respectively. He has sired our sale toppers for both bulls and bred heifers in 2017. Lot 49 is a long-sided bull with an actual weaning weight October 9th of 812 lbs. This bull has an exceptionally clean sheath, a quality that is still important today, but is becoming rare to find.

We've had great calving success using Fortitude genetics on our heifers and second calvers. This guy should follow in those same footsteps. His dam is a maternal sister to our senior herd sire "Big Split."

Lot 64 -72

This group of bulls are all sired by our senior herd sire Willowview Big Split 19A. He is the "complete package" kind of bull that you wish would never grow old.

The dams range from first calvers to seasoned dependable cows. They have all done a fantastic job in raising these guys. Lot 65, 67, 70 and 71 came in to Hagerty's weighing between 750-800 lbs. Lot 64, 66, 68 and 69 were between 806-840 lbs. Lot 72 came in at 928 lbs. They did not receive any creep feed, just mom. This groups 365 average daily gain ranged from 3.09-4.64. Lot 69 and 71 topped that chart.

We look forward to seeing you on sale day.

Ken & Sandy

The last of a set of embryos we collected off our beloved Duchess 90S cow. The bull calves out of this flush have all been outstanding and several have gone to very good homes through this sale including two in successive years to Randy and Sheena Keep from Punnichy. These bulls grow out long, are well muscled and all been extremely docile and this one is no exception – he will be easy to find in our pen on sale day. These Upward sons have all been very easy calvers and will work on heifers or cows.

A big fella right from birth that has never quit growing. Our first round of Renown calves and not quite what we were expecting. Calved easy and has grown out to be the heaviest Angus bull we have ever produced with an actual Sept. 9 weaning weight of 1045 lbs! He has continued to do well on test and is very well put together for a larger frame bull. If you are looking for a performance cow bull, this one will catch your eye in the pen and on paper with an outstanding set of performance EPD's to match his conformation.

### DELIVERY...

Delivery can be arranged at a cost of \$100 per bull within 300 km of Moose Jaw. If you are over 300 km we can assist you in making travel arrangements at cost.

If I were to pick one of our own bulls to use on our own heifers, this would be the one. A slam dunk calving ease bull that will still deliver some nice performance on first calf heifers. A great set of EPD's with matching calving ease genetics on both the top and bottom side of his pedigree. We are into our second set of Mohnen Impressive calves and intend on using him again this year. This bull is bred for the heifer field.

Another calving ease king here sired by Genex's Mohnen Impressive bull. This time mated to a smaller frame Bismarck cow with a picture perfect udder and loads of volume. We are a big fan of Bismarck and he has made his stamp on females and calving ease genetics. Another bull very well suited to a heifer breeding program. Note the calving ease numbers on this one.

KG Solution has been our AI bull two years in row now on first calf heifers and we've liked the calves so much we have actually used him on some cows now as well. Great calving ease and tremendous performance which is a hard combination to find. This fellow will be moderate framed and will work well on heifers or cows. Again, note the nice set of calving ease EPD's to match up here.

Not sure where all the birth weight came from on this one but another Solution son out of a heavy milking Double Vision cow who will probably end up in a cow program but will be a calving ease dream. Most of our females have at least two generations of maternal and calving ease AI genetics in their pedigrees and we often sell 90 lb. plus birth weight bulls into heifer breeding programs as buyers know our program. A bit more performance and frame size here as well which will make him work on cows or heifers.

We were one of the first breeders to use Fortitude and picked him as an outcross calving ease sire from Genex. Our first set of bulls were very popular at the 2016 AAA sale with a high seller going to Doug Mackie in Chaplin and two others to Ken Harle and Reese Klindt. Those three bulls averaged just over \$10,000 for us and we have subsequently continued to use him every year and he has been a very steady performer. This one is out of a very small framed cow who just gave us a nice 60 lb. Solution heifer calf the other night and will be one of those cows who weans a calf almost as big as herself every year. Another calving ease dream and one we would highly recommend for a heifer breeding program.

Another throwback on birth weight given the calving ease pedigree he has but it is what it is. A few years ago we had chosen Mohnen Long Distance for our heifer breeding program and were delighted with his performance. With Connealy Thunder and Rainmaker on the bottom side, this fellow's dam is bred to death for maternal traits and calving ease. A nice moderate framed bull who should be easy fleshing and will have lots of longevity. Will work on heifers but probably better suited to the cow field.

An in dam purchase from Midnight Fire, this fellow has been a herd favorite since he was born. We did not use Final Answer as heavily as some breeders did in the earlier years but wish we had. The dam is a nice moderate framed cow with strong Belvin pedigree which the Friesen's have used heavily in their program. Another calving ease candidate for the heifer field here with matching EPD's and rock solid pedigree.

A direct son of Connealy Freightliner who we still AI to every year as somebody always seems to be looking for some of these genetics. Freightliner was a cow maker and this fellow is mated to another well known maternal line from ABS - HA Image Maker. Freightliner was known for his maternal strength and length of body which shows in this bull's conformation. Some older genetics but tried and proven. Use him in your cow field to produce some great replacements!

The first son out of our Wilbar Foundation 771C herd sire that we have brought to the AAA sale. A younger bull out of a smaller framed Bismarck cow which will work very well on heifers. He will stay very moderate framed and should work as a heifer bull for several seasons. The Foundation genetics also offer some very strong feet and leg structure plus some nice performance which reflect in his EPD's. The Bismarck dam is an ET daughter out of one of Megan's favorite cows and has a beautiful udder, lots of depth of rib and lots of hair. Another heifer bull prospect here.

# TERMS & CONDITIONS

## **TERMS...**

The terms of the sale are cash or cheque, payable at par at the sale location. The right of property shall not pass until after settlement has been made; no invoicing on buyers in attendance unless previous arrangements have been made. Every animal sells to the highest bidder and in cases of disputes, the auctioneer's decision will be final.

Announcements made from the auction block will take precedence over the printed matter in the catalogue. Current exchange rates will be announced sale day. All monies are in Canadian funds.

## **CERTIFICATE OF REGISTRATION...**

Each animal will carry papers issued by the Canadian Angus Association. A certificate of registry duly transferred will be furnished to the buyer for each animal after payment has been made.

## **HEALTH...**

All animals in the sale have met all necessary health requirements.

## **GUARANTEE...**

Each animal becomes the purchaser's risk immediately after the animal is sold. All animals in this sale will be sold under the terms and guarantees set forth by the Canadian Angus Association with regard to health, freedom from defects and from both reproductive and specific genetic unsoundness.

## **INSURANCE...**

We strongly recommend that insurance is purchased for full value.

## **PHONE, MAIL & WIRE BIDS...**

Bidders unable to attend the sale may phone, wire or mail their bids and instructions to the sale manager, auctioneer or special representatives. Bids must be received in sufficient time prior to the sale.

## **LIABILITIES...**

All persons attend the sale at their own risk. The seller, facility owner and sale manager assume no liability, legal or otherwise, for any accidents that occur. It is understood that T Bar C Cattle Co. Ltd. is acting only as a medium between buyer and seller and is not responsible for any obligations to collect or enforce collection of any monies between parties and any legal action that may, in extreme cases, be taken must be between buyer and seller. T Bar C Cattle Co. Ltd. assumes no responsibility of any credit extended by the seller to the buyer. The buyer must look to the seller for fulfillment of all guarantees and representations made hereunder.

## **ERRORS...**

All announcements at sale time, written or oral, supersede any written material in the catalogue.

## **DELIVERY...**

Delivery can be arranged at a cost of \$100 per bull within 300 km of Moose Jaw. If you are over 300 km we can assist you in making travel arrangements at cost.

**Return Undeliverable  
Canadian Addresses To:**
