

A photograph of two white calves standing side-by-side. The calf on the left has a blue identification tag with the number '4010' and a small yellow mark. The calf on the right has a blue identification tag with the number '4011' and a small yellow mark. Both calves are looking directly at the camera. The background is a dark, solid color.

WELCOME to the HTA CHAROLAIS ANNUAL BULL SALE

Welcome to the HTA Charolais Annual Bull Sale! We thank you for your interest in our program and invite you to join us on March 19th.

It is an exciting time to be in the cattle industry with unprecedented prices and enthusiasm. Choosing a herdsire is an important decision. We are happy to help you find the best choice for your operation. We have a couple new sire groups this year for your consideration including LT Governor 1560 Pld – the \$220,000 high-selling performance sire that we feel really fit into our program. There are some sons on offer we think will catch your eye. Pro-Char Versailles 47K – an AI sire we added with a complete outcross pedigree to our herd. Also new this year is the HTA Bullseye 280K sire group. Bullseye, an own son of Tundra, was used solely on heifers with great success. We are sure you'll be impressed by this group being out of first calf heifers. Legacy's Hulk Hogan 50J – this is the second calf crop we have on offer. We think you will quite like what you see. We also have sons of High Class, Astroid, Spiderman and Tundra. The quality is throughout. Actual weaning weights were taken as the calves came off the cows Sept 24 to 29th. All but the individuals expressing scurs were tested for the homozygous polled gene. Results are listed in the catalogue.

ALL BULLS ON OFFER HAVE BEEN SIRE VERIFIED AND 100K TESTED.

Our sale is a video sale. The bulls will not be walking through a sales ring. We encourage you to come early to be able to get a good look through the bulls. We welcome tours through the bull pen and cowherd prior to sale day as well. We are happy to show you the dams, cow families and genetics behind the bulls. Lunch will be served on sale day and we encourage you to stay after the sale to visit with us. Should you be unable to join us in person, the sale will be broadcast online with DLMS.

We are very pleased to be working with the professionals at T Bar C Cattle Co again this year. Please do not hesitate to give any of their staff a call if they can be of any assistance with selection or purchasing.

If you have any questions or wish to otherwise discuss the bulls, please give us a call or send us a text. We look forward to hearing from you and seeing you on sale day!

from the desk at **T BAR C**

March 19th is a very important day in Rivers, Manitoba, as Shawn, Tanya and the gang at HTA Charolais present a powerful and exciting lineup of Charolais sires for your evaluation. This multigenerational farm family has been the source of superior seedstock for decades. Quality with performance is a watch word for the Aireys both in the pasture and bull pens. The strength and uniformity of the 2025 edition of bulls must be credited to a strong and predictable cow herd which has been developed over years. Their sixty-day breeding and calving principles ensure high fertility in the bulls you select.

This awesome presentation of herd sire prospects offers unlimited opportunity to breeders and farmers alike. The Hulk Hogans offer high weaning and yearling weight data, data that has made the Charolais superior in every performance category. Optimal in frame size and birth weight Hulk offers style and hair.

The high selling Governor has added a new dimension through A.I. Adding the calving ease factor gives repeat customers and new visitors rugged bulls many with low birth weight... a winning combination. The Asteroids come from a sire who is proven and predictable with strong weaning and yearling data along with his son Spiderman. The genetic diversity offers any options and opportunities for you to acquire high quality new sires for your breeding pastures.

We urge you to be with us on March 19th for a great offering and selection. Feel free to stop by the farm any time before the sale and preview the bulls and their mothers or just give Shawn a call to discuss your options.

If we, at T Bar C may be of any assistance prior to or sale day, do not hesitate to call any of our team and we will be pleased to assist in a professional and confidential manner.

Travel

Westjet flights are available to Brandon, MB - 30 minutes from the sale location.

Video Sale

Please come early to view the bulls as they will not be going through a sale ring. The sale will be a video sale, inside our heated barn, with the bulls being sorted and penned right outside the barn for your viewing. We welcome you to the farm prior to the sale to view the bulls and the rest of the cowherd, if you cannot make it to the sale or would like more time.

Sight Unseen Purchases

We are committed to helping you find the right bull for your program. If you are unable to attend the sale, or come to view the bulls, please give us a call.

Semen Tests

All bulls will be semen tested, measured and evaluated by a licensed veterinarian. Scrotal measurements will be available sale day.

American Friends

We will ensure all health tests required for export are completed at the Buyer's expense and will work together with you regarding delivery. Exchange rates will be announced at the start of the sale.

Delivery

Free delivery up to 300 kms. Take your bull home sale day and appreciate a \$50 discount.

Volume Discount

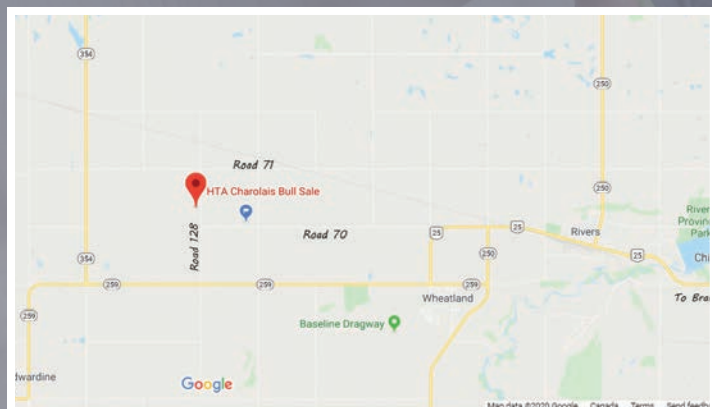

2 Bulls - 2% Discount 3 Bulls - 3% Discount 4 or more Bulls - 5% Discount

Videos of the bulls will be available to view online at

our PROGRAM

We are a family run operation that have been raising Charolais cattle for over 50 years and we are extremely passionate about it. Our mission is to consistently produce top quality Charolais bulls, that add performance and value to herds of all breeds. Our program at HTA is built on years of carefully selected genetics and is just that...a program. We don't follow fads. We stick to the basics of what Charolais should be – a performance breed. Our goal is to be in the business for a long time and we hold ourselves to a high level of honesty and integrity.

The fundamental building blocks of our program is our females. As you look through the pedigrees, you will find many repeat cow families for good reason. Years and years of strategic breeding and selection have built our current cowherd of 160 breeding females. We strive for mothers that are sound structured, efficient, fertile and motherly with quality udders and good dispositions. Great bulls come from great cows. It starts with vigorous calves that are born unassisted and hit the ground and grow. Calving ease is a priority. Vigorous calves born unassisted is calving ease. We prioritize unassisted born calves that are up in minutes looking to nurse their mothers.

We do not have time (or patience) for helping calves get up or suck. Our replacement heifer pen is just as important as the bull pen. This is the future of our herd. We focus on providing appropriate nutrition for proper development and fertility and not to carry extra condition. We breed for 60 days only to keep fertility high. Disposition is a main priority to us. We handle our cattle on foot and in a low stress manner. The quiet dispositions are one of the first things that people notice when visiting our herd. Bottom line, we expect a lot from our herd. Calving ease, vigour, growth, confirmation and structure, fertility, disposition, efficiency... We are constantly looking for

new genetics to improve our cowherd, but finding genetics that meet all of our criteria is no easy task. You can bet the bulls we breed our cows to have been very carefully and strategically selected. We spend many hours selecting genetics and strive for the best. Never single-trait selecting. We run a strict quality control program and cull hard. We only keep the best and cull the rest. Quality over quantity.

Nutrition and exercise are an important part of our herd health management at HTA. Cows are put to pasture June 1st and graze as late in the fall as possible. We carefully manage the land so as not to overgraze pastures. Cows are then fed barley silage and barley straw and expected to walk to water until Christmas, when they are brought in for calving. After calving, their diet is supplemented with rolled barley for energy for milking and in preparation for rebreeding. Chelated minerals – including summer, winter and breeding formulations and free choice salt blocks are provided year-round.

Calves are weaned in the fall and fed free choice hay. We start them on oats and the bull calves are then moved onto an oat-based ration focused on proper development and longevity. Heifers are fed rolled oats and barley with the focus being on providing proper nutrition for growth and fertility. We don't want the bulls or heifers to carry extra condition. We want the bulls to be in prime condition to go out and work, and the heifers to breed (at 14-15 months of age) and continue to grow and mature and reach their potential. Calves are weighed at birth, at weaning, and at 1 year of age, to monitor growth performance and weights are recorded. Cows are weighed going onto pasture each year.

Vaccinating is an integral part of the HTA herd health management. Calves are given Toltrazuril at 1 week of age, Bovishield Gold 5 (BVD, IBR, PI3, BRSV) and Covexin 8 before going to pasture.

Bovishield Gold One Shot and Covexin 8 booster at weaning. Cows are given Bovishield Gold FP5 and Scourguard prior to calving and Covexin 8 before going to pasture every other year.

We are continuously appraising the cows, bull and heifer pens and culling. We cull for many reasons to keep the quality high. If a bull or heifer does not meet our expectations, has structural issues, or a bad disposition, etc., they are culled. We are proud of the progress we have made in our herd and the direction our program is headed.

We invite you to come for a visit, tour the herd and to talk cattle anytime. We enjoy the opportunity to visit with you about our program as well as your program. We know our cows and the bulls and you know your cows – together we can find the right bull to fit your herd. Success can be measured in many ways. One of our measures is our high percentage of repeat customers. Our customers are the most important part of our business!

The Percentage Calving Chart

7% CALVING EASE CHART

COW WEIGHT	CALF WEIGHT
1200 LB	84 LB
1400 LB	98 LB
1600 LB	112 LB
1800 LB	126 LB

1. An average cow of any breed should be able to calve 7% of her body weight.
2. Most Charolais cows will weigh between 1400-1800 lb., expected calf weight to range from 98 to 126 lb.
3. Most Red Angus cows will weigh between 1200-1600 lb, expected calf weight range 84 to 112 lb.
4. Calving ease is MORE important than birth weight because a longer sided calf may calve easy, but the birth weight is higher.

100K TESTING

and why it is valuable

EPDs contain information from an animal's pedigree, performance data and now, possibly DNA, which is used directly to calculate the EPD for that animal in each specific trait. The use of DNA testing (100K test) in the EPD calculation allows us to dramatically increase the accuracy of the EPD.

These Genomically Enhanced EPDs (GEPDs) allow us to better predict the genetic potential for animals that are tested, particularly in young cattle (i.e. yearling bulls) that do not yet have any offspring to evaluate.

The 100K test is roughly equivalent to the reporting of:

- 25 offspring from the tested animal when calculating birth weight
- 15 offspring from the tested animal when calculating weaning weight
- 8 offspring from the tested animal when calculating yearling weight

The 100K test also identifies differences the pedigree alone cannot predict. Full siblings were always assumed to share 50% of their DNA, based on average. The use of the 50K test works to understand the ancestral source of DNA. Evaluations have shown the range of shared DNA can be as low as 35% to 65% or higher. Instead of 25% from each grandparent, it has identified that 30% or more may come from a single grandparent and much less from others.

This is our second crop of "Hulks". We were excited to calve his first daughters this year and they have exceeded our expectations. They have proven to be very good mamas with milk and good temperaments. We look forward to what these females are going to do for our herd. Finding a herdsire that checks all the boxes can be very tough. Hulk Hogan's sire, Game Day, was one of the highest selling bulls in Canada in 2020. The consistency, disposition and performance was very appealing to us. Hulk has met every expectation we had of him. He has added hair, depth of body while keeping the performance and consistency we look for.

We added Governor to our AI program last year to add new genetics. Governor was Lindskov Thiel Ranch's high selling bull in 2022 at \$220,000. He exhibited a great look, performance and a good structured dam with a great udder. We are thrilled with the first sons! They hit the ground and started growing. Calves are big-hipped, deep bodied, easy fleshing, and have good dispositions. Governor has been checking all the boxes.

Astroid has made a very large impact on our herd. We have retained a large number of daughters and granddaughters in our herd. As you browse through the offering, in addition to the Astroid sons, you will find many sons of Astroid daughters. Astroid's Dam - a no miss cow. In 2020, she was awarded the Dam of Excellence award from the CCA. Astroid calved very successfully on heifers or cows. His calves exhibit exceptional vigour. Astroid's curve bending calving ease and growth are impressive and we have never had a bull pass on docility like him.

Spiderman is an Astroid son we raised out of one of our best cow families and retained for our own herd use. Astroid himself had matured to be too big to naturally breed heifers, so Spiderman filled his shoes in the heifer pen. Whether on heifers or on cows, Spiderman calves hit the ground and grow. Calves are born easy and with lots of vigour that gets them up and sucking quickly. Spiderman passes on his length, depth of body and growth. His daughters have great dispositions, beautiful udders and are good mamas. Our highest selling sire group in 2024.

High Class is a herdsire we have used for several years. High Class is a consistent and predictable producer. He not only produces top end bulls but also top end daughters. The High Class calves are sound structured, hairy and have the performance and growth. The females are good producers with excellent udders. No guess work here. The High Class sons are worth a look!

Versailles was a high selling bull out of the reputable Pro Char program in 2023 that we were fortunate to be able to add to our AI program. Described in their sale catalogue as "long as a freight train like all the Great White sons. Tremendous performance, long body, good feet and smooth makeup. This is a bull we feel can add a lot to the breed." We felt he would be a great addition to our herd with a completely outcross pedigree. This first calf crop is consistent, structurally correct, hairy, easy doing and worth a look.

A Tundra son out of one of our favourite cow families that we retained for use in our heifer pen. We are very pleased to present these first sons on offer. Bullseye's dam follows her own dam in type with good feet, depth of body, and very nice uddered. Bullseye's pedigree is maternally stacked with consistent producers. We look forward to your consideration of the Bullseye calves, all out of first calf heifers. We know you will be impressed.

Tundra is a Remington son that we had the opportunity to buy back from one of our commercial customers. Knowing the strong, natural muscle expression and shape that Tundra had as a calf, we felt that he would be a great asset to our herd. Remington has been used hard in our herd for several years and for good reason. The power and performance in the calves combined with the calving ease is hard to match. He has remained in the top 1% of the breed for weaning and yearling. Tundra's dam has been a strong producing female in our herd with sons working in other purebred herds. The Tundra daughters might be the best part of this herdsire.

Contender was the highest selling Charolais bull in Manitoba in 2017. We thought a lot of this bull and kept in interest and used him in our AI program. Use can be limited because of the influence that both Challenge and Remington had on our cow herd. Contender adds growth, muscle definition, and hair. His dam continues to produce in our herd at 12 years old. She also sired Defender who worked for BOB Charolais and now Anchor D Charolais in AB.

We sold Morgan as a yearling to a commercial customer. After seeing the growth & consistency in his calves, his perfect feet and the females he was producing, we added him to our program. His dam produced in our herd until she was 14, but still looked like a young cow. Morgan had perfect feet and moved like a cat right up until he left the farm at almost 9 years old.

HTA CHAROLAIS

TERMS & conditions

TERMS

The terms of the sale are cash or cheque, payable at par at the sale location. The right of property shall not pass until after settlement has been made; no invoicing on buyers in attendance unless previous arrangements have been made. Every animal sells to the highest bidder and in cases of disputes, the auctioneer's decision will be final. Announcements from the auction block will take precedence over the printed matter in the catalogue. Current exchange rates will be announced sale day. All monies are in Canadian funds.

CERTIFICATE OF REGISTRATION

Each animal will carry papers issued by the Canadian Charolais Association unless otherwise stated. A certificate of registry duly transferred will be furnished to the buyer for each animal after payment has been made.

PEDIGREE ESTIMATES

Pedigree Estimates (PE) are created on the projected mating of the animal's sire and dam based on averages of the two, creating estimated values that do not hold the same accuracy of actual EPDs issued from the association and should be used as such.

HEALTH

All animals in the sale have met all necessary health requirements.

GUARANTEE

Each animal becomes the purchaser's risk immediately after the animal is sold. All animals in this sale will be sold under the terms and guarantees set forth by the Canadian Charolais Association with regard to health, freedom from defects and from both reproductive and specific genetic unsoundness.

LIABILITIES

All persons attend the sale at their own risk. The seller, facility owner and sale manager assume no liability legal or otherwise, for any accidents that occur. It is understood that T Bar C Cattle Co. (2013) Ltd. is acting only as a medium between buyer and seller and is not responsible for any failure on the part of either party to live up to his obligations. Neither does T Bar C Cattle Co. (2013) Ltd. assume any financial obligations to collect or enforce collection of any monies between parties and any legal action that may, in exceptional cases, be taken must be between the buyer and the seller. T Bar C Cattle Co. (2013) Ltd. assumes no responsibility for any credit extended by the seller to the buyer. The buyer must look to the seller for fulfillment of all guarantees and representations made hereunder.

DELIVERY

Every assistance will be given in getting your purchases home. Each animal becomes the risk of the purchaser as soon as sold.

PHONE, MAIL, WIRE BIDS

Bidders unable to attend the sale may phone, wire or mail their bids and instructions to the sale manager, auctioneer or special representatives. Bids must be received in sufficient time prior to the sale.

INSURANCE

We strongly recommend that insurance is purchased for full value.

ERRORS

All announcements at sale time, written or oral, supersede any written material in the catalogue.
