WELCOME TO THE MACNAB ANGUS HERD DISPERSAL

Friends and fellow breeders, this is a welcome and your invitation to be with us for our special day. It is with mixed emotions that I write this welcome as our herd and the Angus breed has been a big part of our life. Our family has been raising cattle since 1906, and we have been raising purebred Angus for 65 years starting with the Cloverlake Angus herd. We have been a total family operation, and our grandchildren represent the fifth generation.

The Angus breed and this cow herd have been very good for us and our family. We are very proud of the herd which has been developed over decades, a cow herd that has been strictly culled for fertility, calving ease, udders, and feet. Our top females-built cow families, and the rest went to commercial herds or made a trip to town. There are no cows catalogued that I would not be proud to sell.

We have been marketing 50 to 60 bulls each year by private treaty to our many repeat customers. All the bull calves will sell in the sale with a wintering program and terms. Our 2023 bull calves are outstanding and the best crop we have ever produced.

One of our highlights over the decades of breeding and marketing Angus cattle is the fellowship and friendships we acquired whether it was with commercial producers or fellow breeders. Feel free to stop by the ranch any time prior to the sale for a tour and don't be afraid to give us a call. The cows have been very good for our family, and they will work for you.

FROM THE DESK AT T BAR...

Welcome to the Macnab Angus Complete Dispersal on December 19, 2023, at the heated Lloydminster Exhibition facility. This sale is the largest Angus Dispersal in Canada this fall, so plan to be a part of another day in Angus History.

The herd was started several decades ago by Cheryl's parents John and Cora McNinch; Larry and Cheryl purchased the Cloverlake herd from Cheryl's brother and his wife, Mike and Carmela McNinch in 2008. Since that time Larry and Cheryl and their families have been quietly building an outstanding cow herd while supplying bulls to the farmers and ranchers in the Northwest. Being that they have not sold many females, this is a true 1-Iron herd.

The cow herd is powerful and built on strong predictable cow families. Highly maternal, the cows have volume, great udders, and plenty of milk. As one goes through the herd, calving ease and maternal calving ease is very dominant, but performance has always been used in their herd bull selection. You will love the uniformity of this cow herd and moreover the outstanding set of heifer calves at foot. In planning this dispersal, nothing has changed. The heifers were A.I. bred and turned out with a bull on May 7th. All the bulls sell with a wintering program and terms to fulfill your 2024 breeding needs.

It will be sad to see this great family operation disperse but it leaves unlimited opportunities to select from the outstanding females in this cow herd. Whether you select a proven foundation female, her daughter or granddaughter or the whole family, you can be assured that your selection is from the front pasture.

We all know that this exciting cattle market will continue for years ahead as North America is at an all time low for breeding females in the beef cattle industry. Since the Black Angus cow will remain "queen of the pasture", the Macnab dispersal is the ideal event to select and add to one's program... young, predicable genetics for your front pastures. Just a small reminder that you are 12 days from year end, and I know how you like to send money to Ottawa. Feel free to give Larry or Brad a call or pay them a visit and see the herd in its natural surroundings.

Plan to be with us on December 19th be it in person, online or on the phone it will be worth the trip. Feel free to contact any of the T Bar Team as they will be pleased to assist you with your selections and purchases in a confidential and professional manner.
